Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2011.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

ScamAdviser is an established informational and consumer-protection website that presents website reviews, user-submitted scam reports, fraud alerts, educational resources, testing tools, and optional expert-review services, with an apparent business model supported by advertising, partner activity, and premium features.

Scam/Impersonation Risk

No contradictions were observed: the available evidence contains no phishing, impersonation, malicious-detection, or conflicting-identity indicators. The homepage's stated purpose, content structure, and informational classification are coherent with a consumer-protection service, and the site has a strong global traffic footprint and sustained historical continuity. Limited behavioral anomalies were observed, including suspicious inline scripting and external network activity, but the same inspection found no hidden forms, password-exfiltration forms, wallet activity, clipboard manipulation, or cloaking; these observations therefore do not establish scam or impersonation behavior. A contact-channel integrity anomaly is present because the contact address "info@scamadviser.come" contains a deliverability-breaking top-level-domain error or possible typosquat pattern.

EVIDENCE

- Domain registration telemetry records creation on 2011-07-05 and expiry on 2027-07-05; the domain is 15.15 years old.
- Historical records show 3,697 snapshots spanning 2011-11-07 to 2026-08-23, covering 16 years with a maximum observed gap of 1 year.
- External screening recorded 0 malicious detections, 0 suspicious detections, no Google Safe Browsing malicious result, no abuse reports, and no confirmed blacklist result for the site.
- The homepage's behavioral inspection recorded 2 suspicious inline scripts, 20 external XHR/fetch requests, and 14 external posts; it also recorded 0 hidden forms, 0 password-external forms, 0 wallet-connect runs, and 0 clipboard-write events.

Regulatory Verification Notes

The site presents itself as an informational review and consumer-advice service rather than as a financial intermediary. The homepage describes reports, alerts, the Scam IQ Test, Scam University, user accounts, business listing features, and paid expert reviews; no financial-service license claim or registration number was identified in the reviewed content. That is a transparency item for any regulated procurement or commercial engagement, not evidence of deception. The real-world operator remains independently unverified, so the site's apparent legitimacy should not be treated as proof of a particular legal entity. The registration record identifies GoDaddy.com, LLC as registrar, while the transport and hosting controls provide additional infrastructure consistency.

EVIDENCE

- The registration record lists GoDaddy.com, LLC as registrar and an expiration date of 2027-07-05.
- The site is served from AS13335, CLOUDFLARENET – Cloudflare, Inc., US.
- The site's TLS certificate is issued by YE1, uses Domain Validation (DV), and is valid through 2026-11-20T14:06:14+00:00.
- The homepage is classified as "Informational / Scam review," contains 12,853 characters of captured text, and presents no license authority or license number.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal operator and official contact channels through a trusted external source rather than relying solely on on-site identity claims. The applicable terms, privacy disclosures, subscription or expert-review conditions, cancellation provisions, and payment protections should be reviewed before any paid service is used. If account registration is required, the account purpose and data-collection scope should be confirmed before credentials are submitted.

EVIDENCE

- The homepage provides Register and Login paths, creating an account-interaction surface that warrants ordinary identity and data-use checks.
- The homepage advertises an Expert Review service and premium-related features, making payment terms and cancellation conditions relevant to prospective purchasers.
- The site offers Report a Scam and business-related listing functions, providing independent routes through which the service model and official communications can be checked.

Summary Verdict

Available evidence supports a **high-trust, low-risk posture** for an established informational website. Its apparent legitimacy is evidence-consistent, but the operator's real-world identity is not independently verified, so legitimacy should not be described as proven. No scam, phishing, impersonation, or identity-conflict indicators were observed.

Infrastructure Integrity

Cloudflare CDN/WAF protection is present, and all observed addresses were Cloudflare edge infrastructure rather than exposed origin candidates. This reduces direct origin exposure and is a meaningful defensive control, although protective hosting remains a mitigating technical signal rather than proof of operator legitimacy.

Closing Assessment

Normal informational use is proportionate to the assessed posture; before submitting credentials or making payments, ordinary independent checks of operator identity, service terms, and payment protections should be completed.

Written analysis generated 2026-08-23 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of scamadviser.com.

- The request stayed on scamadviser.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under GoDaddy.com, LLC. [CLEAR](#)

- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-07-05. NOTED
- The earliest public archive of this site is from 2011-11-07. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about scamadviser.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
