

Is scloud.ru legit? TrustSniffer's high-trust assessment: 90/100

scloud.ru

Verdict

HIGH TRUST

scloud.ru appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Corporate landing page for Scloud offering cloud-hosted 1C software rental and related services. Contains product descriptions, tariff information, trial offer, contact details (phone, email, addresses), partner/ certification claims, and links to mobile stores and social channel.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Scloud is a corporate SaaS website offering cloud-based rental and hosting of 1C business software, including accounting and enterprise applications, with subscription tariffs, user-based access, support services, consulting, and a 14-day trial.

Scam/Impersonation Risk

No scam, phishing, impersonation, or conflicting-identity contradictions were observed. The homepage presents a coherent Scloud-branded service model focused on 1C cloud software, with navigation to products, tariffs, support, registration, login, and contact pages. A naming-similarity signal associated the domain with cloud.microsoft, but the content analysis found no suspected brand impersonation; the site's subject matter and service presentation consistently identify Scloud and 1C rather than that unrelated brand. External reputation checks recorded no malicious or suspicious detections, while the site's established traffic presence and sustained historical continuity support an apparently legitimate operating history.

EVIDENCE

- The homepage describes cloud access to 1C, 1C:Accounting, 1C:Fresh, more than 50 configurations, tariffs, support, and a free 14-day trial, with no page-level red flags identified.
- The domain was registered on 2011-05-14 and is 15.25 years old.
- The web archive records 379 snapshots spanning 2012–2026, covering 15 tracked years.
- The site has an established traffic footprint, with rank 27453 and inclusion in the top 1 million.

Regulatory Verification Notes

The available evidence is consistent with an established SaaS provider, but the real-world operator identity is not independently verified. The site supplies contact details, addresses, service information, tariff material, partner and certification claims, and links to support and mobile applications; however, the supplied pages do not establish a licensing authority or registration number. For this type of software-hosting service, that is a transparency and merchant-identity verification point rather than evidence of a scam. No broker-reputation match or adverse third-party signal was identified.

EVIDENCE

- The site's About, Partners, and Contact navigation provides business information, contact details, addresses, and partner or certification claims.
- The domain registrar is REGRU-RU, with registration recorded through 2027-05-14.
- The site is served from AS51115, HLL-AS - HLL LLC, RU.
- Its TLS certificate is issued by GlobalSign RSA OV SSL CA 2018, uses OV validation, and is valid to 2027-04-07.

What to Verify Next

Before credential or payment interactions, independently match the operator named in the site's About and Contact materials to a corporate registry or other authoritative business record. Review the applicable tariff, trial, cancellation, service-level, data-processing, and refund terms, and confirm that the intended payment route provides appropriate commercial protection. Support and contact channels should also be confirmed through an independent route before an account is created or a paid subscription is initiated.

EVIDENCE

- The site's navigation exposes About, Contact, Tariffs, Support, Registration, and Login pages for independent review.
- The homepage offers a 14-day trial and paid tariffs whose commercial terms should be checked before enrolment.
- The site provides phone, email, address, and application or social-channel contact paths that can be cross-checked independently.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for ordinary SaaS interaction. The conclusion is strong at the website-risk level, while the independent connection between the site and a specific real-world operator remains unverified.

Infrastructure Integrity

The site resolves directly to a single identified hosting environment operated by HLL-AS - HLL LLC in Russia, on AS51115, with no CDN or WAF layer identified and one likely origin address. This provides attributable hosting context, although the hosting arrangement itself is only a mitigating technical signal and does not independently establish legitimacy.

Closing Assessment

Normal evaluation may proceed, subject to ordinary independent merchant-identity, contractual, and payment-protection checks before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100
Identity verification confidence	60%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of scloud.ru.

- The request stayed on scloud.ru. It was not redirected to another domain. CLEAR
- Registration is published under REGRU-RU. CLEAR
- DNS for this domain is served by ru., across 2 name servers. NOTED
- The registration is paid up to 2027-05-14. NOTED
- The earliest public archive of this site is from 2012-01-18. CLEAR
- It is hosted on HLL-AS, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about scloud.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
