

Is scotiabank.com.mx legit? TrustSniffer's high-trust assessment: 100/100

scotiabank.com.mx

Verdict

100

OUT OF 100

HIGH TRUST

scotiabank.com.mx appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official-looking Scotiabank México site providing retail and corporate banking product pages, customer support contacts, security guidance, and links to mobile banking and online login.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website presents itself as Scotiabank México, an established retail and corporate banking portal offering accounts, deposits, loans, mortgages, credit cards, payments, investments, customer support, security guidance, mobile-banking access, and online account login.

Scam/Impersonation Risk

No contradictions were observed across the site's banking content, historical continuity, technical identity, and external reputation signals. The site's institutional presentation is coherent with the banking model it describes, and the available checks found no phishing, impersonation, or malicious-reputation indicators. Dynamic testing recorded substantial page changes and external network activity, but these were not accompanied by hidden forms, cloaking, wallet activity, password submission to an untrusted destination, or other abuse patterns; in context, the behavior is consistent with a complex banking portal rather than a confirmed threat. The real-world operator identity remains independently unverified, so the apparent institutional identity should not be treated as conclusively proven. Evidence:

- The domain registration record shows creation on 1999-07-28, an age of 27.06 years, and registration through MarkMonitor.
- Historical records contain 417 snapshots spanning 2002–2026, with 25 years tracked.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no phishing or malicious-site result.
- The homepage behavior assessment recorded no hidden forms, no cloaking, 0 wallet-connect runs, and 0 password submissions to external forms.

Regulatory Verification Notes

The homepage and institutional pages provide substantial banking, support, security, and service information, and the content is consistent with an established bank. The supplied evidence does not independently verify the operator's real-world identity or establish a regulator-confirmed license reference; the on-site disclosure position is therefore an administrative verification gap rather than evidence of fraud. No broker-dataset match or adverse third-party reputational signal was identified. Evidence:

- The website is served through AS16625, operated by AKAMAI-AS — Akamai Technologies, Inc., US.
- Transport encryption uses an OV certificate issued by Sectigo Public Server Authentication CA OV R40, with subject organization The Bank of Nova Scotia, valid through 2027-03-21.

- The registration record lists MarkMonitor as registrar and Bank of Nova Scotia as owner.
- The page content is classified as corporate banking, with no content red flags identified.

What to Verify Next

Before credential or payment interactions, independently confirm that the institutional identity and the specific service channel correspond to the relevant official banking registry and independently published contact information. Review the applicable account, privacy, complaint-handling, and payment-protection terms, and ensure that any login session is reached through an independently confirmed official channel rather than an unsolicited message or advertisement. Evidence:

- Independent registry confirmation is appropriate because operator identity is not independently verified in the supplied evidence.
- The site's account-access workflow involves sensitive financial activity and warrants confirmation of the official access path.
- Service terms and customer-protection provisions should be checked before transactions or account changes.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam or impersonation contradiction was observed, although the available evidence does not independently prove the real-world operator identity.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure, providing a mitigating layer against direct exposure and common web-abuse patterns. Observed infrastructure includes CDN edge servers and potential origin candidates; this protective architecture supports resilience and reduces exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before entering credentials or initiating payments, ordinary independent checks of official identity, service terms, and payment protections should be completed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of scotiabank.com.mx.

- The request stayed on scotiabank.com.mx. It was not redirected to another domain. CLEAR
- Registration is published under Markmonitor. CLEAR
- DNS for this domain is served by akamai.net, across 5 name servers. NOTED
- The registration is paid up to 2027-07-27. NOTED
- The earliest public archive of this site is from 2002-07-21. CLEAR
- It is hosted on AKAMAI-AS, from a server in NL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about scotiabank.com.mx at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
