- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2021.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

PT Bank Seabank Indonesia's website is an official-looking digital retail banking platform presenting savings and deposit products, transfers, e-wallet services, QRIS payments, cash deposits and withdrawals, business banking, lending products, security guidance, customer support, and corporate information. Its apparent business model is to provide digital banking and payment services to retail and business customers.

Scam/Impersonation Risk

No contradictions were observed. The homepage and captured interaction behavior show no login form, hidden sensitive form, credential-harvesting mechanism, wallet connection, cloaking, or brand-impersonation indicator. External reputation checks returned no malicious or suspicious detections, no confirmed blacklist result, and no reported abuse pattern. The site's historical record is consistent with an established domain rather than a newly repurposed or disposable property.

EVIDENCE

- The homepage presents banking products and corporate information without a login form or sensitive-data submission form.
- Behavioral inspection recorded no hidden forms, password-external forms, wallet-drainer activity, clipboard hijacking, or cloaking.
- External reputation evaluation recorded 0 malicious detections, 0 suspicious detections, and no blacklist result.
- Domain registration: 2019-09-24; age 6.88 years. Web archives contain 128 snapshots from 2021-06-24 through 2026-07-23, covering 6 tracked years.

Regulatory Verification Notes

Available content is consistent with an established banking website and identifies PT Bank Seabank Indonesia across its corporate, product, security, governance, transparency, and complaints-related sections. The pages make regulatory-supervision statements and present awards and security advice, but the captured material does not independently establish the operator's real-world identity or provide a license number that can be verified from the site evidence alone. This is a verification and disclosure point, not an observed scam contradiction. The long-running registration, strong public traffic presence, clean external reputation, reputable registrar, and valid transport encryption collectively support the site's apparent legitimacy.

EVIDENCE

- The corporate navigation includes “Informasi Perusahaan,” “Tentang SeaBank,” “Transparansi,” “Tata Kelola Perusahaan dan Hubungan Investor,” “Whistleblowing,” and “Mekanisme Pengaduan.”
- The homepage and product pages describe savings, deposits, transfers, QRIS, SeaBank Pinjam, SeaBank Bisnis, and related banking services.
- The domain is registered through PT Digital Registra Indonesia and expires on 2027-09-24.
- The site is served from AS140940, PBKE-AS-AP – PT Bank Seabank Indonesia, ID. Its TLS certificate is issued by GlobalSign GCC R6 AlphaSSL CA 2025, uses DV validation, and is valid to 2026-10-12.

What to Verify Next

Before credential or payment interactions, an institution should independently confirm that PT Bank Seabank Indonesia appears in the relevant Indonesian banking and financial-services registry, using the regulator’s own directory rather than a link supplied by the site. The official mobile application should be obtained through a known official app-store listing or an independently validated corporate channel, and contact details should be cross-checked through an offline or separately sourced route. Any account, deposit, lending, fee, or dispute terms should be reviewed directly before a material transaction.

EVIDENCE

- The site provides an app-download pathway and describes account-opening and account-linking functions.
- The site exposes dedicated security, fees-and-interest, help-center, and complaints sections for independent review.
- The captured site contains no sensitive transaction form, so credential and payment verification remains a separate step before using the relevant application or service.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate banking website. No scam, phishing, impersonation, or identity-contradiction signal was observed. The principal remaining qualification is that the real-world operator identity is not independently verified by the supplied evidence.

Infrastructure Integrity

The site resolves to one identified likely-origin IP rather than a detected CDN edge, with hosting attributed to PBKE-AS-AP – PT Bank Seabank Indonesia in Indonesia. This coherent, directly attributable infrastructure is a mitigating signal, but hosting alignment and transport protection alone do not prove legitimacy.

Closing Assessment

Ordinary use may be considered proportionate to the site’s high-trust posture, provided independent merchant-identity, applicable service-term, and payment-protection checks are completed before credentials or funds are committed.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of seabank.co.id.

- The request stayed on seabank.co.id. It was not redirected to another domain. CLEAR
- Registration is published under PT Digital Registra Indonesia. CLEAR
- DNS for this domain is served by awsdns-13.com, across 4 name servers. NOTED
- The registration is paid up to 2027-09-24. NOTED
- The earliest public archive of this site is from 2021-06-24. CLEAR
- It is hosted on PBKE-AS-AP, from a server in ID. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about seabank.co.id at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
