

Is sejm.gov.pl legit? TrustSniffer's high-trust assessment: 100/100

sejm.gov.pl

Verdict

100

OUT OF 100

HIGH TRUST

sejm.gov.pl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Official site of the Sejm of the Republic of Poland. Contains navigation, calendar, session schedules, news items, media/live transmissions and accessibility information. No visible forms requesting credentials or payments.

Evidence status and limitations

Evidence completeness:

UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website at sejm.gov.pl is the official public-information portal of the Sejm of the Republic of Poland, presenting parliamentary proceedings, session calendars, agendas, voting information, news, publications, media transmissions, accessibility resources, and institutional contacts as a government/public-service offering rather than a commercial business.

Scam/Impersonation Risk

No contradictions were observed. The homepage's institutional title, parliamentary content, navigation, accessibility features, and links to established social platforms are consistent with a public parliamentary service, while no credential, payment, login, wallet, or other sensitive-interaction form was identified. External reputation checks found no malicious or suspicious detections, and the limited behavioral anomalies recorded during automated interaction—such as external requests and script-related activity—did not produce evidence of phishing, cloaking, credential collection, wallet activity, or data submission. The website therefore reads as apparently legitimate and not scam-oriented, although the real-world operator identity remains likely rather than independently verified.

EVIDENCE

- Homepage: Identifies “Sejm Rzeczypospolitej Polskiej” and provides parliamentary sessions, agendas, calendars, votes, news, publications, media, and accessibility information.
- Homepage behavior: No login form, hidden sensitive form, password submission, wallet connection, clipboard manipulation, or external sensitive form was detected.
- External reputation: Malicious detections were 0, suspicious detections were 0, and the domain was recorded within the top 1 million by traffic.
- Domain registration: Registered 2013-07-01; approximately 13.13 years old.

Regulatory Verification Notes

The site presents itself as a government/public-service institution, not as a financial, commercial, or other licensed service provider. Consequently, the absence of a commercial license claim is not, by itself, a fraud indicator; however, the supplied evidence does not independently verify the real-world legal operator or establish a separate licensing determination. The page content does provide institutional context and contacts, and the apparent identity is consistent with the site's stated parliamentary purpose. The domain is registered through NASK, and its transport encryption uses a known certificate issuer. The available evidence supports an established-site assessment while retaining the stated identity qualification.

EVIDENCE

- Registration record: Registrar listed as NASK; creation date 2013-07-01T02:00:00Z and expiration date 2027-01-01T01:00:00Z.
- Site transport encryption: TLS certificate issued by GlobalSign Atlas R46 DV TLS CA 2026 Q2, using DV validation, valid until 2026-09-02T09:35:52+00:00.
- Homepage: Provides institutional navigation for “Prace Sejmu,” “Posłowie,” “O Sejmie,” publications, archives, media, and accessibility information.
- Page classification: Government/public-service content with no commercial transaction flow or visible payment request.

What to Verify Next

Before credential or payment interactions, ordinary independent checks should confirm that the domain is listed through an authoritative Polish government channel and that any institutional contact route corresponds to the official parliamentary organization. For routine public-information use, the available evidence supports normal browsing; any unexpected request for credentials, payment, document upload, or redirection to another domain should be validated through an independently sourced contact route before proceeding.

EVIDENCE

- Homepage: Publishes institutional contact and accessibility pathways suitable for cross-checking.
- Homepage structure: Provides parliamentary schedules, proceedings, publications, and media content rather than a commercial account or payment workflow.
- Social presence: Links are presented to Facebook, Instagram, Flickr, YouTube, and Google Arts & Culture profiles associated with the institutional site.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate public-service website. The assessment supports ordinary informational interaction, while the real-world operator identity should not be treated as independently proven.

Infrastructure Integrity

The site is protected by Incapsula CDN/WAF infrastructure, which is a mitigating control that reduces direct exposure of the underlying service. Observed network resolution identified only CDN edge infrastructure, and the origin server was not observable in this analysis.

EVIDENCE

- Hosting infrastructure: Served from AS19551 through INCAPSULA - Incapsula Inc, US.
- Edge address: Observed CDN edge IP 45.60.74.29; no origin candidate was identified.
- Infrastructure status: Incapsula CDN/WAF protection was detected, with the site resolving successfully through the protective edge layer.

Closing Assessment

Normal public-information browsing is proportionate to the evidence; before any unexpected credential or payment request is acted upon, independent institutional and transaction-protection checks should be completed.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	79/100
Identity verification confidence	78%

- Identity verified on page
- Trusted social count=3

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sejm.gov.pl.

- The request stayed on sejm.gov.pl. It was not redirected to another domain. CLEAR
- Registration is published under NASK. CLEAR
- DNS for this domain is served by net.pl, across 2 name servers. NOTED
- The registration is paid up to 2027-01-01. NOTED
- It is hosted on INCAPSULA, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sejm.gov.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
