Full analysis

Overview

Select Fashion is a Shopify-based online women's clothing store presenting fashion products, shopping-cart functionality, account access, newsletter promotions, and mainstream payment options for ordinary ecommerce transactions.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed blacklist findings were observed. The homepage presents a conventional retail model, with no cryptocurrency, investment, or unusual payment mechanics; observed behavior also showed no hidden forms, wallet activity, suspicious scripts, or external posting activity. The site's established domain history and clean external reputation support the conclusion that it is a legitimate retail website.

- Homepage: women's clothing ecommerce, cart, account access, newsletter, and mainstream payment methods.
- Homepage behavior: no hidden forms, wallet activity, clipboard manipulation, cloaking, or suspicious inline scripts.
- Domain registration: 15 September 1999; approximately 26.9 years old; expiration 15 September 2034.

Regulatory Verification Notes

The observed business model is ordinary fashion retail rather than a regulated financial service, and no financial license claim is presented in the supplied shopping content. This is a transparency consideration for procurement records, not an indication of deception. The site's technical identity is consistent with an established commercial service, and no adverse broker-reputation match was identified.

- Hosting: AS13335, Cloudflare, Inc., United States; registry ARIN.
- TLS: certificate issued by YE1, domain validation (DV), valid through 11 September 2026.
- Registrar: 123-Reg Limited t/a 123-reg, Tag 123-REG.
- Homepage: payment options include American Express, Apple Pay, Mastercard, PayPal, Shop Pay, Visa, and other mainstream methods.

What to Verify Next

Before formal supplier onboarding, confirm the site’s returns, privacy, and commercial terms and reconcile checkout details with the intended merchant entity. Where policy requires it, independently confirm the organization’s official support and contact channels.

- Homepage: generic “Something went wrong” messages were displayed in the page content.
- Homepage: no structured data or substantive meta description was observed.
- Homepage: the only detected form was a newsletter-email subscription form, with no sensitive form or untrusted destination identified.

Summary Verdict

The website presents a high-confidence established and legitimate retail profile with no observed contradiction or impersonation signal. Its identity, operating model, technical controls, and external reputation converge on a trustworthy posture suitable for normal interaction and standard account use.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, with observed traffic terminating at the Cloudflare edge rather than exposing an origin address. This provides a meaningful defensive layer against direct origin exposure, while remaining a mitigating technical control rather than proof of legitimacy.

Closing Assessment

Normal browsing, account login, and standard ecommerce transactions are appropriate, subject to the organization's routine procurement and payment controls.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about selectfashion.co.uk at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
