- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This is SeoHost.pl, a commercial Polish hosting and domain-services website presenting NVMe/SSD hosting, VPS services, domain registration and transfer, migration assistance, paid plans, and a 30-day money-back guarantee. Its apparent business model is subscription-based hosting and one-time domain sales with optional add-ons, supported by customer account, signup, domain-search, contact, and support functions.

Scam/Impersonation Risk

No contradictions were observed. The available evidence identifies no phishing, impersonation, blacklist, or malicious-reputation indicators, and the site's commercial hosting model, pricing-oriented content, support options, and linked social presence are coherent with the service it presents. Interaction testing did identify dynamic page changes, external requests, and console errors, but it found no hidden forms, password submissions to external destinations, wallet-drainer behavior, clipboard manipulation, or cloaking; these observations are therefore better interpreted as implementation or telemetry noise than as evidence of impersonation. The real-world operator identity remains likely rather than independently verified. Evidence:

- The domain registration record shows creation on 2010-10-19, with an age of 15.82 years.
- Historical records contain 2,730 snapshots spanning 2008–2026, covering 19 tracked years.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no Google Safe Browsing malicious result, and no external blacklist match; the domain ranked 28144 and was within the top 1,000,000 sites.
- The homepage interaction test recorded 62 console errors and a maximum post-interaction DOM difference of 2,775, while detecting 0 hidden forms, 0 wallet-connect runs, 0 wallet-drainer runs, and 0 external password forms.

Regulatory Verification Notes

The site presents an ordinary commercial hosting and domain-registration business rather than a financial service, and no regulated-broker match was identified. No financial license or license number is claimed or verified in the supplied site evidence; for this business type, that is a disclosure and applicability question rather than evidence of fraud. The available identity evidence supports an established, apparently legitimate website, but it does not independently prove the legal operator behind it. Evidence:

- The homepage is categorized as a commercial hosting and domain-registrar page and describes NVMe/SSD hosting, VPS, domain registration and transfer, migration, and refund services.
- The site's hosting infrastructure is served from AS50599, DATASPACE - DATASPACE P.S.A., PL, in Poland.

- The site's TLS certificate is issued by Trustico RSA DV SSL CA 2, uses DV validation, and is valid through 2027-02-14.
- The supplied commercial pages contain pricing, support, contact, cookie, privacy, and refund-related disclosures, but no verified financial licensing information is recorded.

What to Verify Next

Before credential or payment interaction, an independent merchant-identity check should confirm the operating entity and its relationship to the advertised brand. The applicable terms, renewal conditions, cancellation process, domain-transfer obligations, and 30-day refund conditions should be reviewed, and payment should use a method offering appropriate dispute or purchase protection. Any licensing or registration requirement applicable to the specific domain or hosting service should be checked with the relevant official registry, while official support channels should be confirmed through an independent route. Evidence:

- The commercial pages describe paid hosting and domain services, optional add-ons, free migration, and a 30-day money-back guarantee.
- The site exposes login, signup, and domain-search/contact forms, with no sensitive form routed to an untrusted destination in the supplied analysis.
- Social links were observed for YouTube, Facebook, and Meta, providing channels that can be compared against independently sourced business information.

Summary Verdict

SeoHost.pl has a **high-trust, low-risk posture** and the evidence is consistent with an established, apparently legitimate commercial website. Long-term provenance, clean external reputation, coherent business content, and valid transport security converge positively, while the remaining uncertainty concerns independent confirmation of the real-world operator rather than observed scam or impersonation activity.

Infrastructure Integrity

The site resolves directly to a single likely origin address hosted by DATASPACE - DATASPACE P.S.A. in Poland, with no CDN or WAF detected. This is a conventional hosting arrangement and does not itself establish legitimacy, but the identified provider and resolved infrastructure provide a clear technical hosting context.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to routine independent checks of merchant identity, service terms, refund conditions, and payment protection before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of seohost.pl.

- The request stayed on seohost.pl. It was not redirected to another domain. CLEAR
- Registration is published under PERSKIMEDIA Szymon Perski. CLEAR
- DNS for this domain is served by seohost.pl, across 2 name servers. NOTED
- The registration is paid up to 2027-10-19. CLEAR
- The earliest public archive of this site is from 2008-07-25. CLEAR
- It is hosted on DATASPACE, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about seohost.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
