Full analysis

Overview

Serra Verde Express is a Brazilian rail-tourism and travel-booking website offering train tickets, tourism packages, excursions, ecotourism experiences, onboard dining, travel information, customer support, and customer accounts.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent commercial model centred on named rail journeys and tourism products, including Curitiba–Morretes tickets, van-and-train packages, 4x4 excursions, Ilha do Mel tours, and onboard dining. The published prices, itineraries, contact details, booking functions, and customer-service content are consistent with an established travel-commerce operation, and no phishing, brand-impersonation, malicious-content, or suspicious-contact indicators were identified.

- The homepage identifies Serra Verde Express and lists train tickets, tourism packages, ecotourism, excursions, customer support, and account registration.
- The booking catalogue presents specific products such as Curitiba–Morretes rail tickets and excursion packages with stated prices and durations.
- Domain registration: 2000-08-05; age 26.01 years.
- Web archive: 647 snapshots from 2000-11-09 through 2026-06-01, spanning 27 years.

Regulatory Verification Notes

The website provides identifiable business and service information, contact details, booking terms, customer-support material, and policy-oriented content. No regulated financial activity is indicated, and no licence or registration number is claimed in the supplied site content; this is a transparency item for any transport or tourism authorization that may apply, not evidence of deception. External reputation checks produced no malicious or suspicious detections, supporting the site's established commercial presentation.

- The site publishes the contact number (41) 3888-3488 and customer-service navigation through its contact and support areas.
- The site includes pages for "A Serra Verde Express," contacts, departure calendars, customer accounts, and booking services.
- Hosted on AS8075, MICROSOFT-CORP-MSN-AS-BLOCK — Microsoft Corporation, US.
- TLS certificate: issuer YR1, DV validation, valid through 2026-10-01T22:41:17+00:00.

What to Verify Next

Before a transaction, prospective customers should confirm the selected itinerary, departure date, cancellation and refund terms, and the final payment amount within the official booking flow. Where a specific transport or tourism authorization is material to the engagement, the applicable Brazilian registry should be checked independently.

- The homepage provides a “Calendário de saídas” for checking scheduled departures.
- Product pages display itinerary descriptions, durations, prices, and “Reservar Agora” booking actions.
- The site provides account login, registration, customer support, and contact channels for resolving booking issues.

Summary Verdict

Serra Verde Express is a legitimate, established, and trustworthy website with a coherent operating model and no observed indicators of impersonation, phishing, or malicious activity. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with the observed edge address 172.174.121.245 associated with Microsoft's AS8075 infrastructure; the origin server was not observable. This protective architecture reduces direct exposure of the origin and is a mitigating infrastructure signal, not proof of legitimacy by itself.

Closing Assessment

Prospective customers may proceed with normal account, booking, and payment interactions, applying routine checks to itinerary and transaction details before purchase.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about serraverdeexpress.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
