Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an institutional service portal presenting SEST SENAT's education, health, transport-sector programmes, employment initiatives, business partnerships, news, and public-information resources for visitors in Brazil.

Scam/Impersonation Risk

No contradictions were observed. The site's content is informational and service-oriented, with no financial-investment solicitation, cryptocurrency functionality, phishing indicators, sensitive login form, hidden form, wallet activity, or suspected brand impersonation identified. Behavioral testing recorded external requests, external posts, and console errors, but also found no cloaking, password-exfiltration form, wallet-drainer activity, clipboard manipulation, or other abuse mechanism; these observations are more consistent with implementation or third-party integration characteristics than with an impersonation pattern. The available evidence therefore supports an apparently legitimate, low-risk website, while not independently proving the real-world operator identity.

EVIDENCE

- Domain registration record: created 2000-05-19; age 26.25 years; expiry 2032-05-19.
- Web-archive history: 850 snapshots from 2000-09-18 through 2026-08-09, spanning 27 years.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the site had a traffic rank of 56087.
- Homepage behavioral testing recorded 8 external XHR requests, 6 external posts, and 14 console errors, with 0 hidden forms, 0 wallet-connect runs, and 0 clipboard-write events.

Regulatory Verification Notes

The site presents institutional navigation for "Sobre nós," national and regional councils, compliance, privacy and transparency, procurement, auctions, and contact services. It does not present a specific licence or registration number for a regulated financial activity; given the stated education, health, and social-programme model, this is a regulatory-disclosure point to clarify where a particular service requires accreditation, rather than evidence of a scam. The site's apparent institutional identity is consistent with the content and technical history, but the operator's real-world identity remains independently unverified. A third-party broker-reputation source reported no matching profile, which is contextual only and is not a licensing determination.

EVIDENCE

- Homepage navigation includes “Portal da Transparência,” “LGPD,” “Compliance,” “Licitações,” “E-compras,” and “Leilões.”
- Hosting infrastructure: AS262989 — CLICKNET BRASIL INFORMATICA E TELECOMUNICACOES LT, BR; registry LACNIC; country BR.
- Transport encryption: OV TLS certificate issued by Thawte TLS RSA CA G1 to SEST SERVICO SOCIAL DO TRANSPORTE, valid through 2027-01-21T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the relevant institutional identity through an offline or separately sourced contact route, and confirm any accreditation or licensing requirement applicable to the specific course, health service, partnership, or procurement activity. For any paid transaction, ordinary checks of the applicable cancellation or return terms and payment-protection options should be completed before funds or sensitive information are submitted.

EVIDENCE

- The homepage provides an “Encontre uma unidade” function for locating service locations.
- The site exposes “Documentos para cadastro,” “Contribuição,” and “Fale Conosco” routes for operational follow-up.
- The homepage identifies separate areas for customers, courses, health appointments, enterprise services, and employment programmes.

Summary Verdict

The overall posture is strongly favorable and consistent with an established, apparently legitimate institutional website. No scam, phishing, impersonation, or other contradictory signal was observed; the remaining uncertainty concerns independent confirmation of the real-world operator rather than evidence of malicious activity.

Infrastructure Integrity

The site resolves to a single identified hosting address associated with CLICKNET BRASIL INFORMATICA E TELECOMUNICACOES LT in Brazil, with no CDN detected. This direct hosting posture is an infrastructure characteristic rather than an identity finding; the identified provider and stable technical resolution offer useful operational consistency but do not, by themselves, prove legitimacy.

Closing Assessment

Normal informational use is proportionate to the observed posture, while independent identity, applicable accreditation, service terms, and payment-protection checks should precede credential submission or payment activity.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sestsenat.org.br.

- The request stayed on sestsenat.org.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by 140.197, across 6 name servers. [NOTED](#)
- The registration is paid up to 2032-05-19. [CLEAR](#)
- The earliest public archive of this site is from 2000-09-18. [CLEAR](#)
- It is hosted on AS262989, from a server in BR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sestsenat.org.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
