

Is sextrader.co.za legit? TrustSniffer's high-trust assessment: 80/100

sextrader.co.za

Verdict

80

OUT OF 100

HIGH TRUST

sextrader.co.za appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 55%.

What this site appears to be

Age-gated adult classifieds/directory targeting South Africa (since 2000). Provides listings for escorts, models, strippers and similar services; free access for viewers who confirm age. No financial investment or credential-harvesting prompts observed.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

An age-gated adult-services advertising directory, SexTrader.co.za presents listings for escorts, models, strippers, masseurs, and personals in South Africa, with access framed as free for visitors who confirm they are over the stated age threshold; its apparent business model is classified advertising and related contact leads.

Scam/Impersonation Risk

No contradictions were observed. The homepage's content is consistent with an adult classified-directory model rather than an investment, cryptocurrency, payment, or credential-harvesting scheme. It includes an age disclaimer and regional service listings, while the observed page contains no login form, sensitive-data form, or apparent impersonation indicator. The site's statement that it has served South Africans since 2000 is broadly consistent with the long-standing domain registration, although that marketing claim is not independently treated as proof of operator identity.

EVIDENCE

- Homepage: Presents an age-gated directory for escorts, models, strippers, masseurs, and personals, with regional listings across South Africa.
- Homepage behavior: No login form, hidden form, password-exfiltration form, wallet connection, or credential-harvesting prompt was observed.
- Domain registration: Registered 2000-08-29 09:17:52 UTC; age_years 25.96.

Regulatory Verification Notes

The site appears legitimate for its stated advertising-directory purpose, and available external reputation checks found no malicious or suspicious findings. The operator's real-world identity is not independently verified. The available page content does not state a licensing authority or license number; for this type of directory, that is a transparency and applicability question rather than evidence of fraud. Any advertiser-level legality, consent, age compliance, and service obligations remain separate from the directory's technical trust posture.

EVIDENCE

- Registration record: Registrar identified as HOSTAFRICA.
- Hosting telemetry: Served from AS329429, Data Sciences Corporation Pty Ltd.
- Transport security: TLS certificate issued by YR2 with DV validation, valid to 2026-10-19.
- External reputation context: No malicious or suspicious detections, phishing finding, or confirmed blacklist hit was recorded; no broker-dataset match was present.

What to Verify Next

Before credential or payment interactions, independently confirm the legal counterparty operating the site and determine whether any South African licensing, advertising, adult-content, or consumer-protection requirements apply. For any paid listing or service transaction, confirm the applicable terms, cancellation or refund conditions, advertiser identity, and payment-protection arrangements through independent channels. Contact channels should be confirmed through an offline or otherwise independent route before sensitive information is exchanged.

EVIDENCE

- Identity verification: No independent signal connects the website conclusively to a specific real-world operator.
- Commercial diligence: The available assessment identifies an advertising and contact-lead model, making counterparty and payment terms the relevant transaction checks.
- Regulatory diligence: No licensing authority or license number is stated in the available site disclosures.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its observed function. The principal qualification is that the real-world operator identity is not independently verified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The site is protected by Akamai CDN/WAF infrastructure, with observed edge servers and a potential origin candidate. This reduces direct exposure of the serving environment and is a mitigating technical signal, but it does not independently establish the operator's identity or business legitimacy.

EVIDENCE

- CDN/WAF telemetry: Akamai protection detected; 10 edge IPs and 1 likely origin candidate were observed.
- Infrastructure resolution: 11 unique IPs were associated with the site, including CDN edge infrastructure.

Closing Assessment

Normal browsing is proportionate to the available evidence; account or payment activity should proceed only after ordinary independent checks of the counterparty, applicable terms, and payment protections are complete.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sextrader.co.za.

- The request stayed on sextrader.co.za. It was not redirected to another domain. CLEAR
- Registration is published under HOSTAFRICA. CLEAR
- DNS for this domain is served by googledomains.com, across 4 name servers. NOTED
- The registration is paid up to 2026-08-29. NOTED
- It is hosted on Data Sciences Corporation Pty Ltd, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sextrader.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
