- Public web-archive history exists since 2020.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Brazilian B2B payments-infrastructure provider presenting a unified API for Pix, boleto, recurring payments, payment links, and electronic receivables, with the apparent business model of connecting businesses to banks and financial institutions through customized payment-orchestration services.

Scam/Impersonation Risk

No contradictions, phishing indicators, impersonation signals, or confirmed blacklist findings were observed. The homepage presents a coherent corporate payments proposition, with no investment promises, credential-harvesting login flow, or abusive browser behavior identified. Its established domain history, clean external reputation, and sustained public presence support the conclusion that the site is a legitimate operating business rather than a deceptive imitation.

- The homepage is classified as a corporate product landing page for SaaS/payment infrastructure and contains no login form or hidden form.
- Automated reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing flag.
- The domain was registered in 2019 and is approximately 6.88 years old.
- The site has 71 archive snapshots spanning 2020–2026, covering 7 tracked years.

Regulatory Verification Notes

Shipay describes payment APIs covering Pix, boleto, BolePix, Pix Automático, payment links, Duplicata Escritural, bank and fintech connectivity, reconciliation, and cryptoasset integration. These are financial-sector services, so licensing and contractual authorization remain matters for independent confirmation; the supplied site content does not state a licensing authority or registration number. The registration record identifies SHIPAY TECNOLOGIA S/A, while no adverse broker-reputation match was identified.

- The homepage identifies the business as a B2B payments-infrastructure provider offering customized pricing for payment orchestration and financial API services.
- The registration record lists SHIPAY TECNOLOGIA S/A as the owner.
- The hosting infrastructure identifies AS209242, CLOUDFLARESPECTRUM – Cloudflare London, LLC, US.
- TLS uses issuer WE1 with DV validation and is valid through 2026-10-26.

What to Verify Next

For regulated deployments, confirm the applicable licensing, payment-institution status, and contractual authorization directly with the relevant Brazilian registry or counterparties. Independently validate corporate contracting details and official support channels before onboarding the service.

- The homepage presents financial API and payment-orchestration functions but does not provide a licensing authority or registration number in the supplied content.
- The business model relies on customized B2B pricing and operational integrations with banks and financial institutions.

Summary Verdict

The site presents as a legitimate, established, high-trust business with a coherent operating model and no observed contradiction or deception indicators. Normal interaction is appropriate within the context of ordinary business use.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer for exposed web infrastructure. Observed addresses were CDN edge infrastructure, and the origin server was not observable during analysis; this supports reduced direct-origin exposure but is not, by itself, proof of legitimacy.

Closing Assessment

Standard browsing, account login, and ordinary business interaction are appropriate; regulated counterparties should complete their normal onboarding and licensing checks before formal integration.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shipay.com.br.

- The request stayed on shipay.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-05.org, across 4 name servers. NOTED
- The registration is paid up to 2026-09-17. NOTED
- The earliest public archive of this site is from 2020-09-20. CLEAR
- It is hosted on CLOUDFLARESPECTRUM, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shipay.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
