- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is Shop Apotheke, an established online pharmacy presenting medicines, health and beauty products, e-prescription services, delivery and collection options, customer support resources, discounts, and app-based health services for consumers in Germany.

Scam/Impersonation Risk

No contradictions were observed. The website's pharmacy and ecommerce presentation is coherent with its stated purpose, and the supplied analysis found no phishing, impersonation, malicious-content, or credential-harvesting indicators. The presence of a conventional login and registration flow is consistent with an established retail account model, while the site's long-running historical continuity and strong public reach materially support an authentic identity rather than a short-lived imitation.

EVIDENCE

- Homepage analysis identified an ecommerce/online-pharmacy presentation with no detected red flags or brand-impersonation indicators.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and 0 abuse reports; the site ranked 6971 and was within the top 1 million domains.
- Domain registration: 2001-06-07T05:32:30Z; age 25.19 years; registrar CPS-Datensysteme GmbH.
- Web archive: 5000 snapshots from 2002-01-09T22:14:34Z through 2023-10-16T17:13:13Z, spanning 22 years.

Regulatory Verification Notes

The homepage presents a consumer pharmacy proposition and refers to TÜV certification, but the supplied site content does not identify a licensing authority or license number. This is a regulatory-transparency item for confirmation rather than an indication of deception. The available identity, technical, historical, and reputational signals remain consistent with a legitimate established business, and no conflicting legal identities were observed.

EVIDENCE

- Homepage content identifies the business as an online pharmacy for Germany and presents a TÜV certification claim.
- Confirmed hosting: AS50198, SHOP-APOTHEKE-SERVICE-GmbH, Germany.
- Transport security: DigiCert EV RSA CA G2, EV validation, subject organization Shop-Apotheke Service B.V.; valid to 2026-10-21T23:59:59+00:00.
- The supplied page analysis did not identify a licensing authority or license number.

What to Verify Next

For regulated procurement or prescription-related use, confirm the applicable dispensing authorization and responsible operating entity through the relevant pharmacy or medicines regulator. Review the site's terms, privacy, delivery, returns, and prescription-handling information before entering into a material commercial relationship, and use independently corroborated official contact channels for account or order issues.

EVIDENCE

- The homepage provides account, registration, shopping-cart, e-prescription, delivery, and customer-support functions that can be checked against the applicable transaction requirements.
- The site identifies Germany as its target market, making jurisdiction-specific pharmacy authorization the relevant verification point.
- The displayed TLS certificate provides an authenticated transport path for normal site interaction and account use.

Summary Verdict

The overall posture is **high trust**. Cross-evidence convergence supports the conclusion that this is a legitimate, established online pharmacy with an authentic and stable operating profile, and no observed scam or impersonation contradiction. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The site resolves to two likely origin addresses and is hosted directly by SHOP-APOTHEKE-SERVICE-GmbH on AS50198 in Germany; no CDN was detected. This provides a clear, attributable hosting posture, although the absence of a CDN means the infrastructure does not receive the additional exposure-mitigation associated with mainstream edge protection.

Closing Assessment

Normal account access, purchasing, and prescription-related use may proceed under ordinary enterprise security, payment, and privacy controls.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shop-apotheke.com.

- The request stayed on shop-apotheke.com. It was not redirected to another domain. CLEAR
- Registration is published under CPS-Datensysteme GmbH. CLEAR
- DNS for this domain is served by dnsmadeeasy.com, across 5 name servers. NOTED
- The registration is paid up to 2027-06-07. NOTED
- The earliest public archive of this site is from 2002-01-09. CLEAR
- It is hosted on SHOP-APOTHEKE-SERVICE-GmbH, from a server in DE. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shop-apotheke.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent

with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
