The page as captured

https://shop-pro.jp/

What shop-pro.jp served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

shop-pro.jp presents カラーミーショップ, a Japanese subscription-based ecommerce platform for creating and operating online stores, with tiered plans, payment integrations, support services, templates, applications, and related professional assistance.

Scam/Impersonation Risk

No contradictions were observed. The site content is consistent with a mature ecommerce SaaS business: it describes store-building features, payment options, Amazon Pay and WordPress integrations, cross-border commerce, app-store extensions, customer support, and case studies rather than making anomalous investment, financial-return, or credential-harvesting claims. The homepage also presents specific operational indicators, including more than 220,000 deployments and a 94.4% support-satisfaction figure, while technical page analysis found no login form, sensitive form, hidden form, wallet activity, or brand-impersonation indicator. The available evidence therefore supports an apparently legitimate, established website, although it does not independently prove the real-world operator identity.

EVIDENCE

- The homepage identifies the service as カラーミーショップ and describes ecommerce plans, store functions, payment integrations, support, and customer case studies.
- The homepage states “22万件以上” in total deployments and “94.4%” support satisfaction as site-presented business claims.
- Technical page analysis recorded no sensitive forms, hidden forms, password submissions to external destinations, wallet connections, or detected brand impersonation.
- External reputation screening recorded zero malicious and zero suspicious detections, with no blacklist or phishing result.

Regulatory Verification Notes

The apparent business model is a conventional subscription ecommerce platform that monetizes through monthly plans, payment or transaction fees, professional services, and application or marketplace additions. The site states that カラーミーショップ is part of the GMO Internet Group, but the supplied evidence does not independently verify that corporate connection or identify a verified licensing authority. No financial-services license is indicated in the supplied page material; for this type of ecommerce service, that is best treated as a disclosure and applicability question rather than evidence of wrongdoing. The overall reputation and infrastructure signals are supportive, while operator identity remains unverified and the on-page regulatory disclosure position is unclear.

EVIDENCE

- The service and pricing pages describe subscription tiers, payment integrations, setup and design services, APIs, applications, and store-operating support.
- The homepage states that カラーミーショップ is part of the GMO Internet Group; this is an on-site affiliation claim, not independent identity verification.
- The domain was registered on 2004-09-06 and is 21.96 years old.
- The site is served through AS7506, GMO-I-R1 - GMO Internet, Inc., JP; its DV TLS certificate was issued by GlobalSign GCC R3 DV TLS CA 2020 and is valid to 2027-03-17T10:26:27+00:00.

What to Verify Next

Before credential or payment interactions, an enterprise or merchant should independently confirm the operating entity named in the applicable terms, privacy, billing, and support materials, and match it to an authoritative corporate or commercial registry. Any licensing or registration requirement applicable to payment processing or the intended jurisdiction should be checked with the relevant regulator. Standard payment-protection terms, cancellation and refund conditions, and official support channels should also be confirmed through the site's own legal and support pages and, where material, an independent offline contact route.

EVIDENCE

- The site provides dedicated pricing, support, terms-related service information, and merchant onboarding pathways that can be compared for consistent entity and billing details.
- The homepage offers free trials, plan selection, login, document requests, and support access, making the intended account and commercial workflows identifiable.
- The supplied analysis found no confirmed licensing authority or license number associated with the service, leaving applicability and disclosure for independent confirmation.
- The site's payment-options and support materials provide the relevant basis for reviewing payment protection, cancellation, and escalation arrangements.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established and apparently legitimate ecommerce service. The conclusion supports normal service evaluation and ordinary platform use, while the operator's real-world identity should remain treated as unverified rather than proven.

Infrastructure Integrity

The site resolves directly to a single Japanese hosting address, 133.130.34.119, rather than through a detected CDN or WAF edge. This provides less distributed shielding than a mainstream edge-protection deployment, but the resolved infrastructure is attributable to GMO Internet, Inc. and does not itself create a legitimacy contradiction.

EVIDENCE

- Resolved hosting address: 133.130.34.119, Japan.
- CDN detected: false; WAF or trusted CDN vendor detected: none.
- Infrastructure resolution status was successful, with one unique IP and one likely origin address.

Closing Assessment

Ordinary platform evaluation is proportionate to the evidence; before submitting credentials or payment details, independent checks of the operating entity, applicable regulatory requirements, commercial terms, and payment protections should be completed.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shop-pro.jp.

- The request stayed on shop-pro.jp. It was not redirected to another domain. CLEAR
- DNS for this domain is served by shop-pro.jp, across 4 name servers. NOTED
- The registration is paid up to 2026-09-30. NOTED
- It is hosted on GMO-I-R1, from a server in JP. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shop-pro.jp at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
