

Is shop2banh.vn legit? TrustSniffer's high-trust assessment: 100/100

shop2banh.vn

Verdict

100

OUT OF 100

HIGH TRUST

shop2banh.vn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-07-31 by automated analysis. Classification confidence 75%.

What this site appears to be

Vietnamese Shop2banh ecommerce homepage offering priced motorcycle parts, accessories, tires, oils, maintenance packages, and selected automotive accessories. It lists 23 stores, numerous contact numbers, customer-support policies, company registration data, an email address, and nationwide delivery information.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is an established Vietnamese ecommerce storefront selling motorcycle parts, accessories, tyres, lubricants, maintenance packages, and selected automotive accessories through online ordering and a network of physical shops.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other fraud signals were observed. The site presents a coherent retail operation: products carry explicit prices, the homepage identifies 23 stores, and the published customer-service information aligns with the stated business model. Its long-established domain history, sustained archival continuity, meaningful traffic footprint, and clean external reputation provide convergent evidence that this is a legitimate operating website rather than a recently created imitation.

- The homepage identifies 23 physical stores and provides store addresses, telephone numbers, nationwide-delivery information, and customer-support policies.
- The domain dates to 2015 and is approximately 11 years old; its archive contains 284 snapshots spanning 2015–2026, representing 12 tracked years.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no reported phishing finding, and no external blacklist finding.
- The domain is within the global top one million traffic ranking, at rank 189,569.

Regulatory Verification Notes

The site describes a conventional retail and maintenance business rather than a regulated financial or investment service. Company-registration information is published alongside direct business contact details and operating locations. No licensing claim is presented, but the available evidence does not establish that a sector-specific financial authorization would be applicable to this ecommerce activity. No matching third-party broker profile was identified; this is neutral context and not a regulatory determination.

- The homepage publishes company-registration details as part of its business and customer-service disclosures.
- The product catalogue covers motorcycle replacement parts, accessories, tyres, oils, vehicle-specific components, and maintenance services with stated prices.
- The site's transport encryption uses a DV certificate issued by Sectigo Public Server Authentication CA DV R36, valid until 2026-11-17.

- The hosting infrastructure serves the site from AS18403, operated by FPT-VN – FPT Telecom Company in Vietnam.

What to Verify Next

For material orders, standard ecommerce due diligence should include confirming that the selected store appears in the site’s location information, checking the applicable delivery and return terms, and ensuring that the payee and order confirmation correspond to the published business identity. Official contact channels may be confirmed independently when arranging collection, warranty work, or a substantial payment.

- The homepage provides multiple store locations and telephone numbers that can support independent order or collection confirmation.
- Published customer policies provide a basis for checking delivery, support, and post-sale arrangements before purchase.
- Interactive testing found no hidden forms, external password forms, clipboard manipulation, wallet interaction, cloaking, or suspicious inline scripts.
- Both observed interaction runs completed successfully without console errors or untrusted external form destinations.

Summary Verdict

The site has a high-trust posture and reads as a legitimate, established ecommerce operation. Its identity presentation, operating footprint, historical continuity, reputation, and observed behaviour converge without material contradiction. Normal interaction, including account login, ordering, and standard transactions, is appropriate.

Infrastructure Integrity

The site resolves directly to a likely origin address operated by FPT Telecom and does not use a detected CDN or WAF. This is a conventional hosting arrangement; transport encryption is valid, and the observed infrastructure produced no abuse-ready or suspicious network pattern. The absence of an intermediary protection layer neither establishes nor detracts from business legitimacy.

Closing Assessment

Prospective customers may use the site normally, applying routine ecommerce checks to order details, payment instructions, delivery terms, and records for higher-value purchases.

Written analysis generated 2026-07-31 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shop2banh.vn.

- The request stayed on shop2banh.vn. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2015-08-11. CLEAR
- It is hosted on FPT-VN, from a server in VN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shop2banh.vn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
