- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Shop2gether is an established-looking Brazilian online fashion retailer presenting curated clothing, footwear, accessories, brand collections, promotional discounts, account access, mobile-app functionality, and customer support for direct-to-consumer e-commerce transactions.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, confirmed blacklist, or malicious-reputation finding. The homepage presents a coherent retail model with recognizable fashion categories, named brands, discounts, checkout functionality, and customer-account features rather than investment, cryptocurrency, or financial-return propositions. Dynamic testing did identify a hidden form, substantial page changes after interaction, and extensive external browser activity; however, no external password form, wallet connection, wallet-draining behavior, clipboard manipulation, or cloaking was detected. These are implementation and monitoring considerations, not evidence of an impersonation scheme. The site's long-running, continuous historical presence further supports continuity of the retail service.

EVIDENCE

- The homepage presents an e-commerce catalog for clothing, footwear, accessories, brand collections, promotions, account login, app downloads, and customer support, with no red-flag content identified.
- The site's interaction behavior recorded one hidden form and a maximum post-interaction DOM difference of 3,206, while recording zero wallet-connect runs, zero wallet-sensitive runs, zero wallet-drainer runs, zero clipboard writes, and zero external password forms.
- Domain registration records show creation on 2012-02-02; the domain is approximately 14.53 years old.
- Historical records contain 910 snapshots spanning 2012-04-26 through 2026-06-08, covering 15 tracked years with a maximum gap of 1 year.

Regulatory Verification Notes

The website operates as a fashion retailer rather than presenting itself as a regulated financial service, so the absence of a financial licence claim is not, by itself, a scam indicator. The reviewed content does not clearly establish a separately verified real-world operator identity or provide a licensing disclosure relevant to the retail activity; this is a transparency item for ordinary merchant due diligence rather than an identity contradiction. Registration information identifies S2G COMERCIO ELETRONICO S.A., while the site's apparent legitimacy is supported by consistent commercial content, clean external reputation signals, and sustained historical

continuity. A third-party broker-dataset check produced no match, but that result is contextual only and is not a regulatory determination.

EVIDENCE

- Registration records identify the registrant as S2G COMERCIO ELETRONICO S.A., with an expiration date of 2029-02-02.
- The homepage provides access to privacy and service-related terms associated with account authentication and reCAPTCHA.
- The site is served through AS16509, AMAZON-02 – Amazon.com, Inc., US.
- The transport certificate is issued by YE1, uses Domain Validation (DV), and is valid through 2026-09-20.

What to Verify Next

Before credential or payment interactions, an institution or customer should independently confirm that the merchant name used at checkout, the published returns and refund terms, and the payment beneficiary are consistent with the intended Shop2gether service. Contact channels should be confirmed through an independently sourced route, and payment methods offering transaction dispute or buyer protection should be preferred. The account-recovery and checkout flows should also be reviewed for expected data collection and consistent domain presentation.

EVIDENCE

- The homepage exposes login, newsletter, and address-lookup or checkout forms, making account and transaction-flow review the relevant verification point.
- The catalog and promotional pages identify direct product sales, discounts, shipping terms, and installment-payment messaging as the commercial context.
- The account interface offers email-and-password login, email access codes, Google authentication, and Facebook authentication.
- The site provides links to Instagram, Facebook, and Google-associated services that can support independent channel comparison.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated retail purpose. The operator's real-world identity is likely but not independently verified to the standard required for treating that identity as proven.

Infrastructure Integrity

The website is protected by AWS CDN/WAF infrastructure, with the observed edge address 54.232.229.211 on AS16509; no origin candidate was observed. This separation of edge and origin infrastructure is a mitigating security-control signal, but it is not proof of merchant legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before submitting credentials or completing a purchase, ordinary independent checks of merchant identity, returns, and payment protection should be

completed.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shop2gether.com.br.

- The request stayed on shop2gether.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-51.net, across 4 name servers. NOTED
- The registration is paid up to 2029-02-02. CLEAR
- The earliest public archive of this site is from 2012-04-26. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shop2gether.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
