

Is shopee.cn legit? TrustSniffer's high-trust assessment: 90/100

shopee.cn

Verdict

shopee.cn appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-13 by automated analysis. Classification confidence 55%.

What this site appears to be

Shopee China / Shenzhen seller onboarding landing page detailing cross-border solutions for Southeast Asia and other markets: logistics, payment options, seller tools, promotional benefits, case studies, and contact/office information.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

The website is a Shopee-branded Chinese-language seller-onboarding portal for cross-border ecommerce, presenting logistics, payment, marketplace-management, promotional, and support solutions for merchants targeting Southeast Asia and other international markets. Its apparent business model is to onboard third-party sellers and generate revenue through marketplace commissions, fulfillment services, and optional promotional or advertising services.

Scam/Impersonation Risk

No phishing, blacklist, malicious-content, or identity-contradiction signals were observed. The homepage is a substantive seller-onboarding page rather than a credential-harvesting interface: it describes market access, logistics, payment options, seller tools, promotional support, and office or contact information, while the captured page contained no login or sensitive-data form. A brand-similarity signal associated with another Shopee regional domain is not corroborated by the page evidence as impersonation; the content consistently presents a Shopee Shenzhen seller program and no competing legal identities appear across the supplied material.

EVIDENCE

- Domain registration records: created 2015-08-20, age 10.99 years, expiring 2028-08-20.
- Homepage content identifies the service as a Shopee cross-border seller platform and contains no reported phishing or malicious-content indicators.
- Homepage interaction analysis recorded no login form, hidden form, password-external form, wallet connection, clipboard hijack, or cloaking behavior.

Regulatory Verification Notes

The available content is consistent with an established ecommerce marketplace rather than a financial or investment service. The homepage presents the legal name “深圳虾皮信息技术有限责任公司” and describes seller onboarding, fulfillment, payment routing, and marketplace services, but it does not present a licensing claim or registration number; this is a disclosure point for ordinary merchant verification, not evidence of a scam. Registration records identify the registrar as 厦门易名科技股份有限公司 and list the same Shenzhen entity as the registrant, although the real-world operator has not been independently verified. External reputation checks were clean, the domain has a strong established traffic footprint, and the site uses a recognized GlobalSign certificate.

EVIDENCE

- Registration record: registrar 厦门易名科技股份有限公司; registrant 深圳虾皮信息技术有限责任公司.
- Hosting telemetry: served from AS58466, CT-Guangzhou-IDC - CHINANET Guangdong province network, CN.
- Transport encryption: GlobalSign GCC R6 AlphaSSL CA 2025 certificate, DV validation, valid to 2026-10-14T10:36:21+00:00.
- Homepage presents seller onboarding, logistics, payment, and marketplace-management services but no license claim or license number.

What to Verify Next

Before credential or payment interactions, an interested merchant should independently confirm that the legal entity shown on the site corresponds to the intended Shopee regional operation, obtain and review the applicable seller agreement and return or dispute provisions, and confirm payment-protection arrangements with the relevant payment provider. Contact details should also be corroborated through an independently sourced official channel rather than relying solely on information obtained from the landing page.

EVIDENCE

- Homepage navigation provides dedicated sections for seller standards, onboarding procedures, store setup, and product listing.
- Homepage describes official-wallet and third-party payout routes, creating a clear basis for confirming settlement terms before use.
- The site provides contact and office information that can be cross-checked through an independent official source.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for normal marketplace interaction. The assessment does not independently prove the real-world operator's identity, so legitimacy should be understood as evidence-consistent rather than conclusively established.

Infrastructure Integrity

The site resolves directly to infrastructure operated by CT-Guangzhou-IDC on a China-based network, with no CDN or WAF edge layer identified and no origin-concealment posture observed. This is a conventional, attributable hosting arrangement; infrastructure remains a supporting control signal rather than proof of legitimacy.

Closing Assessment

Normal browsing and ordinary seller-research activity are proportionate, while independent merchant-identity, contractual, returns, and payment-protection checks should be completed before submitting credentials or initiating payments.

Written analysis generated 2026-08-13 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopee.cn.

- The request stayed on shopee.cn. It was not redirected to another domain. CLEAR
- Registration is published under 厦门易名科技股份有限公司. CLEAR
- DNS for this domain is served by co.uk, across 4 name servers. NOTED
- The registration is paid up to 2028-08-20. CLEAR
- It is hosted on CT-Guangzhou-IDC, from a server in CN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopee.cn at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
