- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Shopee.com.ar presents itself as the Argentine marketplace of Shopee, offering consumer goods across fashion, electronics, beauty, household, and children's categories alongside flash sales, official stores, shipping information, buyer guarantees, account access, cart functionality, and application-download prompts. Its apparent business model is a conventional online marketplace supported by third-party sellers, promotions, platform services, and logistics.

Scam/Impersonation Risk

No contradictory scam, phishing, impersonation, or malicious-reputation signals were observed. The homepage consistently identifies the service as Shopee Argentina and presents ordinary marketplace content rather than investment, cryptocurrency, or sensitive-data-harvesting mechanisms. Automated behavioral testing did identify two suspicious inline scripts and substantial external network activity, but the observed page had no login form, hidden sensitive form, wallet connection, clipboard manipulation, or wallet-draining behavior; these signals therefore remain technical anomalies rather than evidence of an impersonation campaign. The available evidence is consistent with an established, apparently legitimate site, while independently proving the real-world operator remains outside the evidence.

EVIDENCE

- Homepage: "Shopee Argentina" branding, product categories, promotions, shipping information, and buyer-guarantee content were present.
- Behavioral testing: two successful runs recorded no login form, hidden form, wallet connection, wallet-sensitive activity, clipboard write, or wallet-drainer behavior.
- External reputation checks: zero malicious and zero suspicious detections were recorded, and the domain was within the global top one million traffic set.

Regulatory Verification Notes

The site operates as a general e-commerce marketplace rather than presenting a financial-services offering, so no financial license claim is expected from the visible business model. The page describes Shopee as headquartered in Singapore and identifies Argentina as a market, but the available material does not independently verify the operating legal entity. Domain records associate the site with the registrar nicar and the registrant name IP MIRROR PTE LTD. The site's legal and commercial disclosures should therefore be treated

as an ordinary merchant-identity verification matter, not as evidence of fraud. No adverse broker-reputation match was identified.

EVIDENCE

- Domain registration: registered 2013-10-14; approximately 12.83 years old.
- Web archive: 73 snapshots spanning 2022–2026, with 5 years tracked.
- Hosting record: served from AS138341, SHOPEE-AS – SHOPEE SINGAPORE PRIVATE LIMITED, Singapore.
- Transport encryption: TLS issued by YR2 at DV validation level, valid to 2026-09-10.

What to Verify Next

Before credential or payment interactions, independently confirm the operating merchant entity, applicable terms, return and refund conditions, and the scope of the buyer guarantee through the site's legal and help materials. Payment should use a method offering appropriate dispute and purchase protection, and any seller-specific conditions should be reviewed at checkout. Official brand and support channels should be confirmed through an independent route rather than relying solely on links presented by the site.

EVIDENCE

- Legal and help pages: confirm the named operator, governing terms, returns process, and buyer-protection conditions.
- Checkout and seller pages: confirm the final merchant, order total, delivery terms, and refund route before payment.
- Independent brand-channel check: compare the site's support and account pathways with independently obtained official Shopee channels.

Summary Verdict

The overall posture is **high trust and low risk**, with the evidence strongly consistent with an established, apparently legitimate e-commerce website. The classification does not independently prove the real-world operator's identity, so legitimacy should be understood as evidence-consistent rather than conclusively verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by SHOPEE-AS – SHOPEE SINGAPORE PRIVATE LIMITED, with no CDN detected in the supplied view and one likely origin address identified. This is a stable, attributable hosting posture and a mitigating infrastructure signal, although hosting alignment alone is not proof of business legitimacy.

Closing Assessment

Normal browsing and ordinary marketplace activity are proportionate to the assessed posture; independent merchant-identity, return-policy, and payment-protection checks should be completed before credentials or payment details are submitted.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopee.com.ar.

- The request stayed on shopee.com.ar. It was not redirected to another domain. CLEAR
- Registration is published under nicar. CLEAR
- DNS for this domain is served by awsdns-32.com, across 4 name servers. NOTED
- The registration is paid up to 2026-09-23. NOTED
- The earliest public archive of this site is from 2022-01-10. CLEAR
- It is hosted on SHOPEE-AS, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopee.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
