Full analysis

Overview

The website is a Spanish-language Shopee Colombia consumer e-commerce marketplace presenting product offers, shopping categories, account registration and sign-in, cart access, customer service, payment methods, refund policies, an app-download prompt, and links to regional Shopee sites; its apparent business model is the sale of goods and facilitation of marketplace transactions.

Scam/Impersonation Risk

No contradictions were observed: there were no confirmed phishing, malware, blacklist, or impersonation indicators. The Colombia regional branding, regional-site list, and links to Facebook, Instagram, and LinkedIn are consistent with a legitimate localized storefront; an automated similarity signal associated the branding with another Shopee regional domain, but this is a brand-family relationship signal rather than evidence of impersonation. Runtime inspection recorded suspicious inline scripting and substantial external activity, yet did not identify cloaking, hidden forms, wallet-drainer behavior, clipboard hijacking, or an untrusted password destination. The available evidence therefore supports a low scam and impersonation risk posture.

EVIDENCE

- The homepage is titled “Shopee Colombia | Ofertas Populares, los Mejores Precios” and presents standard marketplace functions, including categories, cart access, customer service, payment, returns, and account navigation.
- The domain was registered in 2019 and is approximately 7.21 years old; registration is recorded through CSC Corporate Domains, Inc.
- The site has 252 archive snapshots spanning 2021–2026, covering 6 tracked years with continuous historical activity.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and no blacklist or phishing hit; the domain is also within the global top-million traffic set.

Regulatory Verification Notes

The site presents terms of service, privacy, returns and refunds, customer-service, complaints, payment-method, guarantee, contact, and “About Shopee” pages. These disclosures are appropriate for a consumer marketplace, but the available evidence does not independently verify the real-world operator identity or establish a third-party regulated status; any applicable merchant registration or jurisdiction-specific consumer-commerce requirements should therefore be confirmed separately. A broker-reputation lookup produced no

match, which is contextual support only and not a licensing determination. The overall evidence remains consistent with an established, apparently legitimate commercial website.

EVIDENCE

- The homepage exposes links to “Términos de servicio,” “Política de Privacidad,” “Política de devoluciones y reembolsos,” “Contáctanos,” “Sobre Nosotros,” “Métodos de pago,” and “Shopee Garantía.”
- The domain registrar is CSC Corporate Domains, Inc.; the recorded creation date is 2019-05-29T11:11:50Z and the expiration date is 2027-05-29T23:59:59Z.
- The site is served on AS138341, SHOPEE-AS – SHOPEE SINGAPORE PRIVATE LIMITED, SG.
- Transport encryption uses a GlobalSign GCC R6 AlphaSSL CA 2025 certificate with DV validation, valid through 2026-10-15T12:31:22+00:00.

What to Verify Next

Before credential or payment interactions, the prospective user should independently confirm the merchant identity associated with the Colombia storefront, review the applicable return and refund terms, and confirm that the proposed payment method provides appropriate transaction protection. Contact channels should be validated through an independently sourced route, and any required Colombian commercial or consumer-protection registration should be checked with the relevant official registry where applicable.

EVIDENCE

- The homepage provides direct paths to customer service, complaints, payment methods, returns and refunds, guarantee, terms, privacy, and contact information.
- The account interface includes “Registrarse” and “Iniciar Sesión,” making independent confirmation of the official storefront and account-recovery process relevant before credential use.
- The regional selector lists Colombia alongside Argentina, Singapore, Indonesia, Thailand, Malaysia, Vietnam, the Philippines, Brazil, Mexico, and Taiwan, supporting a localized regional-site verification step.

Summary Verdict

The website presents a high-trust, low-risk posture and the available evidence is consistent with an established, apparently legitimate marketplace. The conclusion is strong across content, historical continuity, infrastructure, and external reputation, while the real-world operator identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to infrastructure operated by SHOPEE-AS – SHOPEE SINGAPORE PRIVATE LIMITED in Singapore on AS138341, with no CDN edge detected and one likely origin address observed. The hosting context is coherent and identifiable; the protective infrastructure signal is mitigating but is not, by itself, proof of legitimacy.

Closing Assessment

Ordinary use is proportionate to the assessed posture, subject to independent merchant-identity, policy, and payment-protection checks before submitting credentials or completing a payment.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopee.com.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
