Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

Shopee.com is the regional gateway for an established ecommerce marketplace connecting consumers with third-party sellers across Southeast Asia, Taiwan, and Latin America, with country-specific access to shopping, payment, logistics, advertising, and seller services.

Scam/Impersonation Risk

No identity contradictions, phishing behavior, brand impersonation, or confirmed malicious-listing evidence were observed. The domain's long registration history, extensive archival record, substantial global traffic footprint, and consistent marketplace presentation strongly support authenticity. One isolated malicious classification is not corroborated by the other reputation evidence and does not alter the legitimate-site assessment.

- The domain record shows registration through GoDaddy.com, LLC on 4 September 2002, making it approximately 23.93 years old; the registration currently expires on 4 September 2027.
- The web archive contains 5,000 snapshots spanning 28 September 2002 to 2 September 2022, representing 21 years of tracked history without detected semantic repurposing.
- The homepage identifies itself as a Shopee regional ecommerce landing page and offers navigation to 12 named countries or regions.
- External reputation telemetry records a global traffic rank of 11,585, no confirmed external-listing hit, no Google Safe Browsing detection, and no reported abuse associated with the assessed infrastructure.

Regulatory Verification Notes

The assessed homepage is a marketplace gateway rather than a financial-services or investment solicitation page. It does not claim a regulated license, and the supplied evidence does not establish third-party regulatory status; this is consistent with the page's stated ecommerce function rather than evidence of deception. Its principal consumer-facing representations are the Shopee Guarantee, access to seller ratings and communications, and free marketplace access without listing commissions. Domain-registration privacy through Domains By Proxy, LLC is an ordinary administrative arrangement for this long-established site and does not create an identity conflict.

- The homepage states that purchasers receive the ordered items or their money back under the "Shopee Guarantee."
- The homepage directs customers to review seller ratings and contact sellers with questions, confirming a third-party marketplace model.
- The homepage advertises no download cost, listing fees, or commission for the promoted access model.
- No broker-profile match or on-page licensing claim was identified; neither constitutes an adverse regulatory determination.

What to Verify Next

Prospective purchasers should select the correct regional marketplace, confirm the individual seller’s rating and transaction terms, and establish the precise coverage and claim process of the applicable purchase guarantee before higher-value orders. Organizations considering a commercial relationship should independently validate the relevant contracting entity, payment arrangements, and jurisdiction-specific terms. Where a particular service may require local authorization, its status should be checked with the competent registry for that jurisdiction.

- The homepage routes visitors through country- and region-specific selections, making jurisdictional context material to the applicable service terms.
- The marketplace structure places fulfillment performance partly with individual third-party sellers.
- Buyer-protection messaging establishes a refund-oriented assurance whose detailed conditions are not presented in the captured landing-page text.

Summary Verdict

The website is legitimate, established, and trustworthy, with strong convergence across historical continuity, public usage, reputation, technical operation, and coherent marketplace content. No contradictory evidence undermines its identity or stated purpose, and normal interaction—including account login and standard platform use—is appropriate.

Infrastructure Integrity

The site is served from AS138341, operated by SHOPEE SINGAPORE PRIVATE LIMITED in Singapore, rather than from infrastructure identified as a third-party CDN or WAF. Transport encryption uses a valid domain-validated certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, expiring on 16 November 2026; these controls support connection integrity but are not, by themselves, proof of legitimacy.

Closing Assessment

Standard consumer and business use is appropriate, subject to ordinary marketplace diligence regarding counterparties, transaction terms, and payment protections.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	38%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopee.com.

- The request stayed on shopee.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-23.org, across 4 name servers. NOTED
- The registration is paid up to 2027-09-04. NOTED
- The earliest public archive of this site is from 2002-09-28. CLEAR
- It is hosted on SHOPEE-AS, from a server in SG. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopee.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
