

Is shopflix.gr legit? TrustSniffer's high-trust assessment: 100/100

shopflix.gr

Verdict

100

OUT OF 100

HIGH TRUST

shopflix.gr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automate analysis. Classification confidence 75%.

What this site appears to be

A SHOPFLIX Greek ecommerce marketplace page dominated by a Cookiebot consent declaration. It discloses extensive analytics, behavioral measurement, advertising, retargeting, geolocation, and device-fingerprinting activities involving numerous partners, without showing clear phishing or financial-fraud signals.

Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is an established Greek e-commerce marketplace that presents consumer-product search, shopping-cart functionality, and merchant offers, with an apparent revenue model based on sales or merchant commissions, advertising, and referrals.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, malicious reputation findings, or other scam indicators were observed. The domain has maintained a dense, continuous historical presence without evidence of repurposing, while the captured page contained no concealed credential forms, external password submissions, wallet interactions, clipboard manipulation, or cloaking. These converging signals support the conclusion that SHOPFLIX is a legitimate and established website.

- The homepage identifies the service as “SHOPFLIX” and describes it as a nationwide Greek marketplace; its captured content contains no fraud-related claims or deceptive financial promotions.
- The domain was registered in 2022 and is approximately 4.44 years old.
- The web archive contains 3,052 snapshots spanning 2022–2026, representing 5 years of tracked history with no detected semantic drift or suspicious repurposing.
- Reputation checks recorded no malicious or suspicious classifications, no phishing finding, no abuse reports, and an established global traffic position at rank 60,183.

Regulatory Verification Notes

The observed business is a general consumer marketplace rather than a financial, investment, brokerage, or crypto service, and the captured material makes no claim to a sector-specific financial licence. Its privacy-consent interface provides unusually detailed notice of advertising and analytics processing: it states that data may be shared with 1,022 partners and requests consent for precise geolocation, device fingerprinting, personalized advertising, audience measurement, and product development. This extensive processing is transparently presented and preference controls are offered, but institutional users should assess whether the consent model and partner scope satisfy their own privacy, procurement, and data-governance requirements. The organization-validated transport certificate also binds the service to a named corporate organization, reinforcing its operational identity.

- The homepage’s consent declaration identifies 1,022 processing partners and expressly describes personalized advertising, analytics, precise-geolocation collection, and active device-characteristic scanning.
- The same interface states that processing preferences can be selected and that consent can subsequently be changed or withdrawn through the cookie declaration.

- The site is served from AS20940 (Akamai International B.V.); its OV TLS certificate was issued by DigiCert Global G3 TLS ECC SHA384 2020 CA1 to WELLCOMM SINGLE MEMBER S.A. E-COMMERCE & INTERNET SERVICES and is valid until 2027-02-04.
- The captured homepage contained no financial-service, brokerage, cryptocurrency, or licensing claim.

What to Verify Next

Enterprise onboarding should confirm the contracting merchant or marketplace entity in the applicable terms and invoices, review seller responsibility and dispute-resolution provisions, and evaluate the consent configuration against the institution's privacy requirements. Official customer-service channels and transaction policies should also be confirmed through the marketplace's published contractual materials before procurement or repeat commercial use.

- The captured page was principally a cookie-consent and privacy-settings interface rather than a full set of contractual or seller-governance documents.
- The observed marketplace functionality includes product search, shopping-cart operations, conversion measurement, and retargeting, making merchant responsibility and transaction terms relevant to institutional due diligence.
- The page exposes preference-management controls for the disclosed data-processing purposes.
- The site presents social-presence references for Facebook, Pinterest, and TikTok.

Summary Verdict

SHOPFLIX is a legitimate, established, and trustworthy e-commerce website. Its continuous provenance, coherent commercial identity, clean external reputation, meaningful traffic footprint, and organization-validated security credentials converge without contradictory risk signals. Normal interaction, including account login and standard marketplace transactions, is appropriate.

Infrastructure Integrity

The website is protected by Akamai CDN/WAF infrastructure. All four observed addresses were Akamai edge systems, and the origin server was not directly exposed during the analysis; this reduces direct infrastructure exposure but is treated as a security mitigation rather than independent proof of legitimacy.

Closing Assessment

Prospective users may engage with the marketplace normally, applying standard e-commerce controls for seller selection, payment records, returns, and account security.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopflix.gr.

- The request stayed on shopflix.gr. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2022-02-23. CLEAR
- It is hosted on AKAMAI-ASN1, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopflix.gr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
