

Is shopier.com legit? TrustSniffer's high-trust assessment: 100/100

shopier.com

Verdict

100

OUT OF 100

HIGH TRUST

shopier.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

Turkish-language marketing and information page for Shopier, an established e-commerce infrastructure provider serving independent sellers and their customers. It describes free storefront creation, card-payment processing, shipping integrations, mobile tools, transaction fees, payout timing, support contacts, security practices, and extensive legal and refund policies.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2006.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the Turkish-language presence of Shopier, an established e-commerce infrastructure provider offering independent sellers free hosted storefronts, card-payment processing, shipping integrations, mobile commerce, customer management, and reporting. Its transaction-funded model applies service fees starting at 2.99% plus TRY 0.49, excluding VAT, with potential additional revenue from optional applications and features.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, deceptive financial promises, or other fraud indicators were observed. The domain's long-established registration and extensive archival continuity support provenance, while its strong global traffic footprint and clean external reputation are consistent with a widely used operating service rather than a recently created imitation. The inspected homepage contained no sensitive or hidden form, and observed network submissions remained within recognized destinations.

- The domain registration record shows creation on 30 April 2006—approximately 20.27 years old—with GoDaddy.com, LLC as registrar and expiration on 30 April 2029.
- The web archive contains 363 snapshots from 2 July 2006 through 27 July 2026, spanning 21 tracked years, with no detected suspicious repurposing or semantic drift.
- External reputation checks recorded no malicious or suspicious detections, no phishing classification, no abuse reports, and a global traffic rank of 8,555.
- Behavioral inspection of the homepage found 0 hidden forms, 0 external password forms, 0 suspicious inline scripts, and no cloaking or clipboard interference.

Regulatory Verification Notes

The reviewed site presents extensive legal, security, refund, pricing, payment-flow, and payout information, demonstrating substantive consumer and merchant disclosures. However, the supplied page evidence does not establish an on-page license claim, license number, or independently confirmed regulatory status. This is a limited verification point concerning the scope of any regulated payment activity, not evidence of impersonation or illegitimacy; no adverse broker-dataset match was identified. Private registration through Domains By Proxy is an ordinary administrative arrangement in this context and does not undermine the convergent legitimacy evidence.

- The homepage describes platform rules for independent sellers and provides detailed information concerning pricing, payment handling, security, refunds, and legal policies.
- No license authority or license number was identified in the reviewed page content.

- The site's transport encryption uses a valid domain-validated certificate issued by YE1, expiring on 5 September 2026.
- The reviewed third-party broker-intelligence dataset contained no matching record for the site.

What to Verify Next

For institutional onboarding or payment-provider due diligence, the contracting entity's legal name, registration particulars, applicable payment-services permissions, settlement terms, data-processing obligations, and complaint escalation route should be reconciled against the executed merchant agreement and the relevant official registries. Operational teams should also confirm official contact channels independently and test refund, payout, and account-recovery procedures before production integration.

- The homepage advertises support contacts and describes security practices that can be tested during onboarding.
- The site provides refund and legal-policy materials suitable for comparison with the proposed contractual terms.
- The seller journey includes account access, order administration, and payout timing, creating identifiable controls for pre-production validation.

Summary Verdict

The website is legitimate, established, and trustworthy. Its durable provenance, substantial operating footprint, coherent commercial presentation, clean reputation, and benign observed behavior converge on a high-confidence assessment suitable for normal use.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure. All six observed addresses were edge nodes and no origin candidate was exposed; this reduces direct origin-server exposure but is appropriately treated as a security mitigation rather than independent proof of legitimacy.

- The hosting infrastructure served the assessed site from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Six unique CDN edge addresses were observed, including 104.20.23.138, while 0 likely origin addresses were identified.

Closing Assessment

Normal interaction, including account login, account administration, and standard transactions, is appropriate; regulated enterprises may proceed through their ordinary vendor-onboarding and contractual due-diligence controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence

25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopier.com.

- The request stayed on shopier.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-04-30. CLEAR
- The earliest public archive of this site is from 2006-07-02. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopier.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
