Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Shoplazzza is an AI-powered ecommerce SaaS platform for creating and operating online stores, presenting storefront generation, product management, payments, checkout, fulfillment, marketing, analytics, and dropshipping services for merchants.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent merchant-software purpose, with no detected phishing, impersonation, malicious reputation, or deceptive financial behavior. The available evidence supports treating the site as a legitimate established service.

- Homepage: Describes an all-in-one ecommerce platform with merchant-focused functionality and a free-trial model.
- Homepage behavior: No wallet activity, credential-exfiltration form, cloaking, or brand-impersonation indicator was detected.
- Domain registration: Registered 2017-04-13 (~9.31 years old).

Regulatory Verification Notes

Shoplazzza presents legal links, support resources, and company contact pathways consistent with a commercial SaaS provider. The available site material does not establish a regulated financial license or registration number; this is a transparency item for applicable business or payment services, not evidence of fraud. The domain is registered through Alibaba Cloud Computing (Beijing) Co., Ltd., and external reputation checks were clean.

- Registrar: Alibaba Cloud Computing (Beijing) Co., Ltd.
- Hosting: Served from AS45102 (ALIBABA-CN-NET).
- TLS certificate: Issued by WoTrus DV Server CA, DV validation, valid to 2026-08-28.
- Authority and reputation: Established global traffic presence; no malicious or suspicious detections were recorded.

What to Verify Next

Before procurement or reliance on services that may be subject to local regulation, confirm the operating entity and any applicable licensing or registration through the relevant official registries. Standard account onboarding and routine platform use are appropriate.

- Homepage: Provides legal and support navigation for independent review.
- Merchant-service context: The platform describes payments, fulfillment, and related ecosystem services, making jurisdiction-specific regulatory confirmation appropriate where applicable.

Summary Verdict

Shoplazza presents a legitimate, established, and trustworthy posture with strong convergence across its business purpose, technical operation, reputation, and site quality. No scam, phishing, impersonation, or identity contradiction was identified.

Infrastructure Integrity

The hosting evidence is internally consistent, with the site served from AS45102 under Alibaba (US) Technology Co., Ltd. and protected by a valid DV TLS certificate issued by WoTrus DV Server CA through 2026-08-28.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate; organizational users should complete their usual procurement and regulatory checks before entering formal commercial arrangements.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shoplazza.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
