

Is shopney.co legit? TrustSniffer's high-trust assessment: 100/100

shopney.co

Verdict

100

OUT OF 100

HIGH TRUST

shopney.co appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 60%.

What this site appears to be

Shopney markets a no-code SaaS platform for turning Shopify stores into white-label mobile shopping apps. The page describes app design, Shopify synchronization, integrations, push notifications, marketing automation, support, customer reviews, case studies, a free trial, and flexible monthly subscription plans.

Key findings

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2019.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Shopney is an established software-as-a-service platform that enables Shopify merchants to create branded iOS and Android shopping applications without coding. It presents design, store synchronization, push-notification, in-app marketing, integration, support, and migration capabilities through monthly subscriptions, with a 30-day free trial and no commission on merchant sales.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behavior, malicious reputation findings, or other fraud indicators were observed. The site's long operating history, sustained archival presence, established traffic footprint, coherent Shopify-focused content, and stable interactive behavior converge strongly with the profile of a legitimate commercial SaaS provider. Promotional claims—including a five-star rating from more than 3,000 brands and significant improvements in mobile conversion and engagement—are ordinary marketing assertions rather than evidence of financial manipulation, although their precise performance implications will naturally vary by merchant.

- The homepage consistently describes a no-code Shopify mobile-app builder and presents aligned product features, pricing, customer reviews, case studies, and support resources.
- The domain was registered in 2018 and is approximately 7.85 years old; registration is maintained through Name.com, Inc. until September 2029.
- The web archive contains 127 snapshots from August 2019 through June 2026, spanning 8 tracked years without detected semantic repurposing.
- External reputation checks recorded no malicious or suspicious classifications, no threat-list finding, no reported abuse, and an established traffic rank of 230,573.

Regulatory Verification Notes

Shopney presents a conventional technology-subscription service rather than a financial, investment, brokerage, or crypto offering, so the absence of a financial-services licence claim is consistent with its apparent business model. Legal-policy links are present, but the available homepage evidence does not establish the full contracting-entity and corporate-registration disclosures contained within those documents; this is a minor procurement-transparency point rather than a legitimacy concern. No broker-profile match was identified, which carries no adverse implication for a non-broker SaaS business.

- The homepage describes monthly software plans, a 30-day free trial, and a model under which Shopney states that it takes no commission on merchant sales.

- The homepage provides links to legal policies and presents customer-support, migration, review, and case-study resources.
- The site's transport encryption uses a domain-validated certificate issued by WE1, valid until 21 October 2026.
- Page analysis found no cryptocurrency products, investment solicitation, sensitive embedded form, hidden form, or external password-submission mechanism.

What to Verify Next

Standard enterprise onboarding should confirm the legal contracting entity shown in the applicable terms and invoice, review the privacy and data-processing provisions against organizational requirements, and assess the Shopify permissions and integration scope requested during deployment. Merchants relying on advertised outcomes should also validate relevant customer references and model expected conversion benefits using their own operational data.

- The homepage offers a request-a-demo route, subscription pricing, migration assistance, and support resources suitable for procurement confirmation.
- The product description involves Shopify synchronization and multiple integrations, making permission scope and data-handling terms relevant to deployment review.
- The homepage attributes customer feedback to Shopify App Store reviews and links its performance claims to case-study material.

Summary Verdict

The evidence supports a confident assessment that Shopney is a legitimate, established, and trustworthy SaaS website. Its provenance, clean external reputation, coherent commercial proposition, and professional operating profile converge without contradictory risk signals.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and web application firewall. All observed addresses were Cloudflare edge servers, so the origin server was not exposed during the assessment; this reduces direct infrastructure exposure but is a protective control rather than independent proof of legitimacy.

- The hosting infrastructure serves the site from AS13335, operated by Cloudflare, Inc.
- The observed Cloudflare edge addresses were 172.67.72.203, 104.26.1.249, and 104.26.0.249.

Closing Assessment

Normal interaction, including account login and standard use, is appropriate, subject to routine SaaS procurement and access-governance controls.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
--------	------------

Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopney.co.

- The request stayed on shopney.co. It was not redirected to another domain. CLEAR
- Registration is published under Name.com, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-09-30. CLEAR
- The earliest public archive of this site is from 2019-08-23. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopney.co at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that

evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
