- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

SHOPOZZ is a Russian-language cross-border shopping and delivery service that helps customers order products from US, European, and other international online stores, arrange sourcing and delivery, calculate shipping, manage orders, and obtain customer support.

Scam/Impersonation Risk

No blacklist, phishing, malware, brand-impersonation, or conflicting-identity signals were observed. The homepage presents a coherent ecommerce model, including product catalogs, recognized retailer categories, delivery services, order-by-link purchasing, shipping insurance, customer reviews, account functions, and support channels. The presence of login and password-reset forms is consistent with account and order management, and normal account interaction is appropriate.

- The homepage identifies SHOPOZZ as an international shopping and delivery service and provides product, retailer, delivery, support, and account functions.
- The homepage contains no detected phishing, impersonation, cryptocurrency, or deceptive-investment indicators.
- External reputation checks recorded zero malicious and zero suspicious detections, with the domain ranked within the global top one million.
- The domain was registered in 2012 and is approximately 14.27 years old; archival coverage records 1,755 snapshots across 14 years, from 2013-02-11 through 2026-07-12.

Regulatory Verification Notes

The business presents as a commercial ecommerce and logistics intermediary rather than a regulated financial service. The supplied site content does not identify a regulated license or license number; this is a limited disclosure point requiring contextual confirmation only if a particular service or jurisdiction makes licensing relevant. The available policy, delivery, support, and customer-service content supports a developed operating model, while the absence of a matched third-party broker profile provides no adverse reputational signal.

- The homepage describes commercial purchasing, sourcing, international delivery, shipping calculations, and ancillary delivery services.
- The site presents customer-support, delivery, policy, review, and order-management content rather than financial-investment claims.
- The domain is served through AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU.

- Transport encryption uses a DV certificate issued by GlobalSign GCC R6 AlphaSSL CA 2025, valid through 2027-01-13.

What to Verify Next

Before a material order, the relevant terms, delivery conditions, insurance provisions, refund process, and final checkout amount should be reconciled with the intended purchase. For jurisdiction-sensitive transactions, the applicable commercial registration or consumer-protection requirements should be confirmed through the relevant official registry, and support-channel details should be independently confirmed where practical.

- The homepage provides delivery, sourcing, order-by-link, shipping-insurance, and account-management functions requiring transaction-specific review.
- The account interface includes login, password-reset, callback, and newsletter forms.
- The site identifies Moscow as a delivery location and provides a telephone contact route on the homepage.

Summary Verdict

SHOPOZZ presents as a legitimate, established ecommerce and delivery business with a coherent operating model, sustained historical presence, clean external reputation, and no observed contradiction signals. The evidence supports normal interaction, including account login and standard transactions.

Infrastructure Integrity

The site resolves to a single identified hosting address operated by DDOS-GUARD in Russia, without a detected CDN or separate edge-IP layer. This is a conventional, identifiable hosting arrangement; the valid GlobalSign certificate provides transport protection, while hosting infrastructure should be treated as a mitigating technical control rather than independent proof of legitimacy.

- Hosting infrastructure resolves to one IP address, 95.129.232.49, in Russia.
- The hosting network is AS57724, DDOS-GUARD - DDOS-GUARD LTD, RU.
- No CDN was detected and one likely origin address was identified.

Closing Assessment

Normal use is appropriate, with ordinary transaction diligence applied to order terms, delivery commitments, and applicable consumer protections.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopozz.ru.

- The request stayed on shopozz.ru. It was not redirected to another domain. CLEAR
- Registration is published under RD-RU. CLEAR
- DNS for this domain is served by io., across 2 name servers. NOTED
- The registration is paid up to 2027-04-28. NOTED
- The earliest public archive of this site is from 2013-02-11. CLEAR
- It is hosted on DDOS-GUARD, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopozz.ru at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
