Full analysis

Overview

ShoppingGives is a cause-marketing and social-impact software platform for ecommerce and enterprise brands, presenting donation campaigns, nonprofit partnerships, integrations, analytics, impact reporting, customer examples, and pathways for pricing or demonstrations.

Scam/Impersonation Risk

No contradictions were observed. The site presents a coherent SaaS business model, with no phishing, impersonation, malicious-content, or deceptive-collection indicators identified. Its published functionality—such as round-up donations, store donations, post-purchase giving, and impact analytics—is consistent with a professional cause-marketing platform. Normal interaction, including account login where applicable, is appropriate.

- The homepage identifies ShoppingGives as cause-marketing software and presents products, integrations, case studies, testimonials, and customer metrics.
- The site contains one email-newsletter form, with no login form, hidden form, password submission, or untrusted form destination.
- The domain was registered on 2015-05-10 and is approximately 11.23 years old.
- Historical records contain 353 snapshots spanning 2016–2026, covering 11 tracked years.

Regulatory Verification Notes

The site provides company, legal, privacy, terms, contact, pricing, and demonstration pathways appropriate to a commercial software provider. No regulated financial-service license is claimed or identified; this is a transparency point for ordinary commercial due diligence, not evidence of misconduct. Independent reputation context is clean overall, and the site has an established global traffic presence.

- The homepage links to Terms of Use and Privacy Policy and identifies ShoppingGives as part of CPGIO's platform.
- The site is hosted on AS16509, Amazon.com, Inc.
- TLS is issued by YR1 at DV validation level and is valid through 2026-10-24.
- The domain appears within the global top one million traffic ranking, at rank 26053.

What to Verify Next

For enterprise onboarding, confirm the contracting legal entity, review the applicable terms and privacy provisions, and validate any donation, nonprofit-partner, or impact-reporting claims against the relevant commercial documentation. Where a transaction involves regulated charitable activity, confirm the responsible counterparties through the appropriate jurisdictional registry.

- The homepage provides pricing and demo pathways suitable for direct commercial confirmation.
- The site presents nonprofit partnerships, donation mechanisms, integrations, and impact reporting as core service areas.
- Legal and privacy resources are available from the site for contractual and data-handling review.

Summary Verdict

ShoppingGives presents as a legitimate, established, and trustworthy business software website with a coherent identity, mature content, sustained historical presence, and no observed contradiction or material deception signal. Its overall posture supports ordinary professional engagement.

Infrastructure Integrity

The site benefits from Amazon-hosted infrastructure and active DV TLS protection. These controls support transport security and operational resilience but are mitigating infrastructure signals rather than proof of business legitimacy.

Closing Assessment

Routine business engagement, account access where applicable, and standard platform use are appropriate, subject to normal enterprise procurement and contractual review.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shoppinggives.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
