Full analysis

Overview

This is the Portuguese-language Shopping Smiles website, presenting an airline-loyalty and ecommerce platform for managing miles, arranging travel, accessing partner services, and redeeming rewards or making purchases.

Scam/Impersonation Risk

No contradictions were observed. The site's content is consistent with a genuine loyalty-program and ecommerce operation, with no supplied indicators of phishing, brand impersonation, malicious activity, or deceptive business mechanics. Its historical presence and clean external reputation support an established identity.

- The homepage presents the Smiles loyalty program, miles management, travel services, subscriptions, partners, and shopping functions.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain was registered in 2014 and is approximately 12.17 years old.
- Web archives contain 40 snapshots spanning 2024–2026, covering 3 tracked years.

Regulatory Verification Notes

The site presents a consumer loyalty, travel-booking, subscription, partner-services, and merchandise-redemption model rather than a clearly stated regulated investment service. No license number or licensing authority is identified in the supplied site findings, so applicable consumer, payments, travel, or financial-service obligations should be confirmed independently. A third-party broker screening record produced no match; this is contextual reputation information, not a licensing determination.

- The registered owner is identified as SMILES FIDELIDADE SA.
- The domain registration currently extends through 2033-06-04.
- The site uses a DV TLS certificate issued by Amazon RSA 2048 M01, valid through 2026-11-02.
- The site has an established page authority profile in the supplied analysis.

What to Verify Next

Confirm any licensing or registration requirements applicable to the specific service being used through the relevant official registry, and validate the applicable account, subscription, redemption, refund, and partner-

service terms through the site’s official channels. Contact details should be independently confirmed before resolving disputes or making high-value commitments.

- The supplied page findings identify no confirmed licensing authority or license number.
- The site’s stated business model spans loyalty services, travel arrangements, subscriptions, and commerce, creating multiple terms and regulatory contexts to review.

Summary Verdict

The website presents as a legitimate, established, and trustworthy service with no observed scam or impersonation contradictions. Normal interaction, including account login, account actions, and standard transactions, is appropriate.

Infrastructure Integrity

The site is hosted on AS16509, operated by Amazon.com, Inc., with a US server endpoint. This mainstream hosting posture and the active Amazon-issued TLS certificate provide useful infrastructure integrity and transport-security support, while remaining mitigating controls rather than proof of legitimacy.

- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- Server IP: 52.85.154.80.
- TLS certificate validation level: DV.
- TLS certificate issuer: Amazon RSA 2048 M01; valid to 2026-11-02.

Closing Assessment

Prospective users may proceed with normal account access and standard purchasing or redemption activity, applying ordinary contractual and transaction-review practices.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [shoppingsmiles.com.br](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
