Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is the corporate information portal of Shoprite Holdings, presenting its African retail group, brands, financial reporting, governance, sustainability programmes, supplier resources, careers, and company news; its purpose is corporate communication and stakeholder engagement rather than soliciting investments or deposits.

Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing behaviour, or deceptive financial-return propositions were observed. The registered organization aligns with the Shoprite identity displayed on the homepage, while the long-established domain and extensive archival record provide strong provenance. External threat-reputation checks were clean, and interactive testing identified no credential harvesting, cloaking, suspicious scripts, or unauthorized outbound form activity.

- The domain registration record identifies Shoprite Checkers (Pty) Ltd and Lexsynergy Limited; registered 18 August 1999 (~27 years old), with registration valid to 18 August 2027.
- The web archive contains 287 snapshots spanning 20 July 2001–3 January 2026 (26 years tracked), with no evidenced suspicious repurposing or semantic business-category shift.
- The corporate homepage consistently identifies Shoprite Holdings and contains no detected brand-impersonation indicators.
- Technical reputation screening recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, and no reported abuse associated with the assessed infrastructure.

Regulatory Verification Notes

The homepage provides substantial corporate-governance and stakeholder material, including director information, financial results, integrated reports, shareholder announcements, annual-meeting resources, and sustainability reporting. The website does not present itself as a broker, deposit-taker, or investment platform, so the absence of a financial-services licence claim is consistent with its stated retail and corporate-communications function. No governance or ownership opacity is indicated, and no adverse broker-reputation match was identified.

- The homepage navigation includes “Our Directors,” “Governance,” “Latest Financial Results,” “Latest Integrated Report,” “SENS Announcements,” and “Annual General Meeting.”
- The supplier area offers onboarding information, supply-chain materials, an enterprise-development programme, a small-supplier toolkit, and a supplier portal.

- The careers, newsroom, media-enquiries, community, and sustainability areas provide distinct channels for major stakeholder groups.
- The assessed homepage contained no investment solicitation, deposit request, cryptocurrency product, or sensitive-input form.

What to Verify Next

For formal onboarding, counterparties should reconcile the legal entity named in the relevant contract, invoice, supplier application, or recruitment communication with Shoprite’s published corporate documents. Payment instructions and material changes to supplier or employment arrangements should be confirmed through independently sourced corporate channels, consistent with standard anti-fraud controls.

- The website offers dedicated corporate contact, media-enquiry, supplier, and careers pathways suitable for independent channel confirmation.
- Published financial reports and shareholder materials provide documentary sources for legal-entity and governance checks.
- The homepage presents separate supplier and recruitment workflows, enabling communications to be checked against the appropriate business function.

Summary Verdict

The website is a legitimate, established, and trustworthy corporate presence. Its identity, historical provenance, substantive corporate content, clean external reputation, and benign observed behaviour converge without contradiction. Normal interaction, including account login and standard use where offered, is appropriate.

Infrastructure Integrity

The site is served through Amazon infrastructure consistent with a mainstream content-delivery environment. Its valid domain-validated TLS certificate protects transport confidentiality and integrity; these controls mitigate technical exposure but are supporting security measures rather than standalone proof of legitimacy.

- The hosting infrastructure serves the site from AS16509 (AMAZON-02 — Amazon.com, Inc., US).
- The site’s transport encryption uses a DV certificate issued by Amazon RSA 2048 M04, valid to 10 February 2027.

Closing Assessment

Prospective users and enterprise counterparties may engage through the site’s normal functions, applying routine organizational controls for consequential payments, contractual commitments, and account changes.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shopriteholdings.co.za.

- The request stayed on shopriteholdings.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Lexsynergy Limited. CLEAR
- DNS for this domain is served by awsdns-55.com, across 4 name servers. NOTED
- The registration is paid up to 2027-08-18. NOTED
- The earliest public archive of this site is from 2001-07-20. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shopriteholdings.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
