

Is shorelinetelecom.com.br legit? TrustSniffer's high-trust assessment: 100/100

shorelinetelecom.com.br

Verdict

100

OUT OF 100

HIGH TRUST

shorelinetelecom.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-02 by automated analysis. Classification confidence 70%.

What this site appears to be

Shoreline Telecom presents a Portuguese-language catalog of networking, fiber-optic, telecommunications, and security products, alongside support, firmware, cybersecurity, privacy, and corporate information.

- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2022.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Shoreline Telecom is a Portuguese-language ecommerce and product-support website presenting telecom, fiber-optic networking, security-camera, routing, switching, ONT/ONU, cabling, and related technical products, with accompanying firmware, cybersecurity, privacy, RMA, and contact resources for commercial distribution and support.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand-impersonation signals, or confirmed malicious reputation findings were observed. The homepage presents a coherent Shoreline Telecom catalog with specific products such as SH3 Pro and SH7 security cameras and SH-1015W ONTs, while the support and cybersecurity sections reinforce the same commercial identity. The domain also shows continuous historical presence rather than suspicious repurposing, supporting the conclusion that the website is legitimate and suitable for normal interaction.

- Homepage: coherent Shoreline Telecom product catalog covering cameras, routers, switches, OLTs, ONTs/ONUs, fiber components, and tools.
- Support pages: dedicated RMA, downloads, cybersecurity, vulnerability-disclosure, and security-update resources.
- Domain registration: registered 2021-07-14; approximately 5.05 years old, expiring 2028-07-14.
- Web archive: 28 snapshots spanning 2022–2026, tracked across 5 years, with no detected repurposing or semantic drift.

Regulatory Verification Notes

The site presents corporate, privacy, cybersecurity, support, and contact information consistent with a hardware-distribution business rather than a financial or investment service. No regulated-financial license claim is established in the supplied content, so any sector-specific authorization, if relevant to a proposed transaction, should be confirmed independently. The available third-party reputation context contains no matched broker warning, and the site's technical identity is supported by valid transport encryption and established hosting records.

- Corporate and policy navigation: includes “Sobre Nós,” privacy, coordinated vulnerability disclosure, security updates, support, and contact pages.
- Hosting: served from AS269237, CarandaiNet Servicos de Internet Ltda., Brazil.

- TLS: DV certificate issued by YR1, valid through 2026-10-02.
- Product-support content: firmware, downloads, RMA, and cybersecurity resources are presented as part of the same site identity.

What to Verify Next

For any commercial engagement, confirm applicable business registration, warranty and RMA terms, product authenticity, and official support channels through independently sourced company records or an offline contact route. Standard account login and ordinary site use are appropriate within the stated business purpose.

- RMA and support pages: provide the relevant after-sales support pathway.
- Downloads and security pages: identify the site's firmware and security-maintenance functions.
- Contact and corporate pages: provide the stated channels for confirming commercial identity and service terms.

Summary Verdict

The website presents as an established, legitimate, and trustworthy telecom-equipment business with a coherent commercial purpose, sustained presence, clean reputation signals, and no observed impersonation or phishing contradictions. Its overall posture supports normal interaction, including account login and standard use.

Infrastructure Integrity

The site resolves directly to two likely origin addresses rather than a CDN edge, with no CDN or WAF identified. This provides less intermediary shielding than a CDN-backed deployment, but the resolved hosting identity is explicit and the infrastructure does not introduce a material trust concern in this assessment.

Closing Assessment

Prospective users may proceed with normal browsing, login, product evaluation, and ordinary commercial engagement, applying standard procurement controls for pricing, delivery, warranty, and authorization.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shorelinetelecom.com.br.

- The request stayed on shorelinetelecom.com.br. It was not redirected to another domain. CLEAR
- DNS for this domain is served by 207.243.2804:617c:f000::177, across 3 name servers. NOTED
- The registration is paid up to 2028-07-14. CLEAR
- The earliest public archive of this site is from 2022-02-07. CLEAR
- It is hosted on AS269237, from a server in BR. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shorelinetelecom.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
