- Automated classification: Not Scam.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2024.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

shorttv.live is a consumer-facing ShortMax entertainment and streaming website that presents a catalog of episodic short dramas, organized by genre and language, with play and download actions. Its apparent business model is media consumption, potentially supported by advertising or affiliate downloads rather than financial products or user deposits.

Scam/Impersonation Risk

No contradictions were observed across the reviewed site content, technical behavior, domain history, and external reputation checks. The homepage presents a coherent entertainment-media purpose, with no observed phishing indicators, sensitive login forms, wallet-connect behavior, cloaking, or brand-impersonation pattern. Available reputation checks returned no malicious or suspicious detections, and the site has a strong global traffic footprint. The real-world operator remains independently unverified, so the evidence supports an established, apparently legitimate website rather than proving the identity of the operating entity.

EVIDENCE

- The homepage is a ShortMax media catalog containing drama titles, episode descriptions, genre and language navigation, and play/download actions.
- The domain was registered on 2023-08-01 and is approximately 3.03 years old; registration is through GoDaddy.com, LLC.
- The site has 56 archive snapshots spanning 2024–2026, covering 3 tracked years with a maximum recorded gap of 1 year.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and a traffic rank of 4288.

Regulatory Verification Notes

The reviewed material describes a standard informational entertainment service and does not present an explicit financial, deposit-taking, or investment activity. The homepage material does not display a legal-entity name, licensing statement, registration number, or equivalent operator disclosure; this is a transparency item for ordinary merchant and content-service verification, not evidence of a scam. No matching third-party broker-reputation record was identified, although that absence is contextual only and is not a regulatory determination. The site's transport security is technically valid, but domain-validated TLS confirms control of the domain rather than the legal identity of its operator.

EVIDENCE

- The reviewed homepage identifies the service as “ShortMax” and focuses on streaming and downloadable short drama content; no financial solicitation is visible.
- No license claim, license authority, or registration number is displayed in the reviewed page material.
- TLS is valid through 2026-11-25 and was issued by Amazon RSA 2048 M04 at DV validation level.

What to Verify Next

Before any credential or payment interaction, independently confirm the operator’s legal identity through an authoritative business or service contact, review the applicable terms, privacy, refund, and download conditions, and confirm that any requested payment method provides appropriate consumer protection. For downloaded media, confirm the service’s content-rights and usage terms. Official support channels should be validated through an independent route rather than relying solely on contact details presented on the site.

EVIDENCE

- The homepage analysis found no login form, sensitive form, hidden form, or untrusted form destination.
- The reviewed content contains play and download functionality, making the applicable download, usage, and content-rights terms relevant to prospective users.
- The site behavior was stable across 2 successful evaluation runs, with no detected cloaking, clipboard hijacking, wallet-drainer behavior, or suspicious inline scripts.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate, low-risk entertainment website. The high-trust posture is supported by converging content, behavioral, historical, reputation, and transport-security signals, while the operator’s real-world identity remains unverified. No scam, phishing, impersonation, or other contradictory signal was observed.

Infrastructure Integrity

The site resolves through Alibaba infrastructure in the United States, with no CDN or WAF layer detected in the supplied network facts and one likely origin address identified. This direct-hosting posture provides less intermediary shielding than a proxied deployment but is a neutral technical characteristic and does not, by itself, indicate malicious activity.

EVIDENCE

- Hosted on AS45102, identified as ALIBABA-CN-NET — Alibaba (US) Technology Co., Ltd., CN.
- The resolved hosting country is the US, with 1 unique IP and 1 likely origin IP; no edge IPs or detected CDN were recorded.

Closing Assessment

Normal browsing and media use are proportionate to the current assessment; any credential or payment step should follow the independent identity, terms, and consumer-protection checks outlined above.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shorttv.live.

- The request stayed on shorttv.live. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by awsdns-03.org, across 4 name servers. NOTED
- The registration is paid up to 2029-08-01. CLEAR
- The earliest public archive of this site is from 2024-01-18. CLEAR
- It is hosted on ALIBABA-CN-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shorttv.live at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
