

Is showtv.com.tr legit? TrustSniffer's high-trust assessment: 90/100

showtv.com.tr

Verdict

90

OUT OF 100

HIGH TRUST

showtv.com.tr appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-17 by automated analysis. Classification confidence 55%.

What this site appears to be

Turkish Show TV site page listing TV series, program schedules, episode descriptions, trailers and live stream. Primary purpose is informational/media consumption for viewers.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

What showtv.com.tr served when TrustSniffer captured it on 2026-08-17. The page may look different now.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This is the Show TV website, a Turkish television broadcaster and content portal presenting television series, scheduled programming, news, episode material, and live viewing; its apparent model is audience media consumption supported by broadcasting, advertising, licensing, and brand promotion rather than deposits or investment services.

Scam/Impersonation Risk

No scam, phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The site's content is internally consistent with a television broadcaster, and the available reputation signals are clean, including no malicious or suspicious detections and an established global traffic presence. Behavioral inspection did record suspicious inline scripts, substantial DOM changes, and some external network activity, but these did not result in credential theft, payment capture, wallet connection, cloaking, or other abuse patterns; within the overall evidence, these are better understood as implementation and advertising-related signals than as evidence of impersonation. The apparent operator remains unverified, so the legitimacy conclusion is evidence-consistent rather than proof of real-world identity.

EVIDENCE

- The homepage presents television series, programs, news, trailers, episode material, and live broadcast access, with no financial or investment proposition.
- Domain registration evidence records creation on 1997-06-06, with an age of 29.22 years and expiration on 2027-06-05.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, and a traffic rank of 18146.
- Behavioral inspection recorded 2 suspicious inline scripts, 8473 maximum DOM differences after interaction, and 0 wallet-provider detections; the homepage was classified as having no brand-impersonation indicators.

Regulatory Verification Notes

The site appears to operate in an informational broadcasting and streaming context rather than as a financial or investment service. No license authority or license number is identified in the supplied site material, although that absence is not itself evidence of wrongdoing for a television content portal. The real-world operator identity is not independently verified, and the available material should therefore be treated as consistent with an established broadcaster rather than as definitive proof of corporate identity. No matching third-party broker-reputation entry was identified.

EVIDENCE

- The site's TLS certificate is issued by RapidSSL TLS RSA CA G1 at DV validation level and is valid to 2026-12-27T23:59:59+00:00.
- Captured server telemetry identifies AS60068, CDN77 - Datacamp Limited, GB.
- The homepage contains substantial broadcaster content, including schedules, episode pages, news, and live-stream functionality, and no sensitive form was detected.
- The supplied site material records no license authority and no license number.

What to Verify Next

Before any credential or payment interaction is introduced, an enterprise or prospective user should independently confirm the broadcaster's legal operator through authoritative corporate or media-industry records, review the applicable terms and privacy provisions, and confirm that any payment process is covered by standard payment protections. Official support and contact channels should be confirmed through an independent route, and any new request for financial information should be assessed against the site's stated media purpose.

EVIDENCE

- The homepage analysis recorded 0 total forms, no login form, and no sensitive form.
- The site was classified as a media, television-broadcast, and streaming service with an informational low-risk business model.
- The supplied identity evidence does not independently connect the website to a verified real-world operator.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated media purpose. No contradictions were observed, but the operator's real-world identity is not independently verified, so the conclusion should remain qualified rather than treated as proven identity.

Infrastructure Integrity

Infrastructure resolution identifies AS34984, TELLCOM-AS - Superonline Iletisim Hizmetleri A.S., TR, with one resolved address and one likely origin address; no edge IPs or deployed CDN were identified. A trusted CDN signal is nevertheless recorded as a mitigating infrastructure factor, while the absence of a confirmed edge layer means the hosting arrangement should be understood as direct rather than strongly fronted.

Closing Assessment

Normal media consumption is proportionate to the available evidence; credential or payment interactions should proceed only after the ordinary independent identity, policy, and payment-protection checks are satisfied.

Written analysis generated 2026-08-17 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of showtv.com.tr.

- The request stayed on showtv.com.tr. It was not redirected to another domain. CLEAR
- DNS for this domain is served by awsdns-28.net. NOTED
- The registration is paid up to 2027-06-05. NOTED
- It is hosted on CDN77, from a server in CZ. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about showtv.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
