Full analysis

Overview

Shrine Solutions is an ecommerce website that sells customizable Shopify themes and AI-assisted store-building tools, presenting product demonstrations, pricing, support, and conversion-focused features for merchants seeking to build online stores.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent Shopify-theme business, while behavioral checks found no hidden forms, suspicious scripts, external posting activity, wallet-drainer behavior, or cloaking. Countdown, cart-reservation, and discount prompts are promotional ecommerce mechanics rather than evidence of impersonation or phishing.

- The homepage identifies Shrine Solutions and describes Shopify themes, AI-assisted store building, demonstrations, support, and customer features.
- Behavioral testing recorded no external XHR or posting activity, hidden forms, clipboard manipulation, wallet connection, or wallet-drainer behavior.
- The domain was registered on 2014-12-11 and is approximately 11.65 years old.
- The site has 65 archive snapshots spanning 2025–2026, with 2 years tracked.

Regulatory Verification Notes

The site operates as a conventional digital-product ecommerce business, selling Shopify themes at one-time prices of \$149 and \$349 with support, updates, demos, FAQs, and optional affiliate commissions. No regulated financial-service claim or licensing number is evidenced in the supplied content; this is a transparency and procurement-verification point, not an identity contradiction. Registration privacy is an administrative detail, and the available evidence supports a legitimate established business identity.

- The homepage states that the seller is Shrine Solutions and presents a digital-product ecommerce model.
- The domain registrar is GoDaddy.com, LLC.
- The site is served through AS13335, operated by CLOUDFLARENET – Cloudflare, Inc., US.
- TLS uses issuer YE2 with DV validation and is valid until 2026-10-08.

What to Verify Next

For a formal procurement or higher-value purchase, confirm the applicable refund, support, and update terms at checkout and retain the transaction record. Where corporate onboarding requires it, independently confirm the seller's legal entity and payment descriptor through the site's published business channels.

- The homepage provides pricing, checkout, support, updates, demos, and FAQs for review before purchase.

- Checkout displays Visa, Mastercard, American Express, Apple Pay, Google Pay, Discover, and PayPal.
- The homepage publishes promotional claims including “2000+ Happy Customers” and “23,000+ Reviews”; these should be treated as marketing claims unless independently substantiated.

Summary Verdict

The site presents as a legitimate, established, and trustworthy ecommerce entity with a high-trust posture. The available page, behavioral, reputation, domain, and infrastructure signals converge without evidence of phishing, impersonation, or malicious activity.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a meaningful mitigating control, and the observed address belongs to Cloudflare edge infrastructure; the origin server was not exposed in the analysis.

Closing Assessment

Normal account login, standard browsing, and ordinary purchasing are appropriate, subject to routine confirmation of transaction and support terms.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shrine.io at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
