

Is shujaahost.co.ke legit? TrustSniffer's high-trust assessment: 80/100

shujaahost.co.ke

Verdict

80

OUT OF 100

HIGH TRUST

shujaahost.co.ke appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 70%.

What this site appears to be

Commercial Kenyan web hosting provider (ShujaaHost) offering shared, reseller and VPS hosting, domain registration and related support. Pricing tiers and plan features are listed; contact phone, email and office address provided. No signs of financial-investment or credential-harvesting deception.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Public web-archive history exists since 2017.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

This website is a Kenyan commercial hosting provider presenting shared hosting, VPS services, reseller hosting, domain registration, website tools, and customer support, with revenue apparently derived from recurring hosting subscriptions, domain purchases, and related add-on services.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there are no confirmed phishing, impersonation, blacklist, malicious-content, or identity-conflict indicators. The homepage presents a conventional hosting business rather than an investment, cryptocurrency, or credential-harvesting proposition; its claims concern fast and affordable hosting, SSD storage, free SSL certificates, and a SitePad website builder. The site does contain login and order workflows, but testing found no hidden forms, external password-submission destinations, wallet connections, clipboard manipulation, or suspicious inline scripts. One external screening result was marked suspicious, but it was isolated and uncorroborated; the broader screening evidence recorded no malicious detections or blacklist hit.

EVIDENCE

- The homepage describes shared hosting, VPS servers, reseller hosting, domain registration, migration, SSL, and website-builder services.
- The homepage contains login and order forms; behavioral testing recorded no hidden forms, external password forms, wallet activity, or clipboard writes.
- The domain was registered on 2017-02-08 and is approximately 9.51 years old.
- Historical records show 66 snapshots from 2017-05-12 through 2025-10-16, covering 9 tracked years.

Regulatory Verification Notes

Available evidence is consistent with an established, apparently legitimate hosting business, although the real-world operator identity is not independently verified. The site identifies itself as ShujaaHost and provides business contact information, while its terms-of-service and support materials support a normal commercial-service model. The site does not present a licensing or registration number; for a web-hosting provider this is primarily a disclosure and entity-verification matter rather than evidence of deception. Registration is recorded through KWE Holding Limited. Third-party broker intelligence produced no match, and the measured external reputation is broadly favorable despite the single uncorroborated suspicious result noted above.

EVIDENCE

- The website’s homepage title identifies the service as “Web Hosting and Domain Registration in Kenya.”
- The domain registrar is KWE Holding Limited; the recorded registration expiry is 2027-02-08.
- The site is served from AS16276 (OVH - OVH SAS, FR).
- TLS uses issuer YE2 with DV validation and is valid to 2026-11-02T08:00:10+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently match the legal entity named on invoices and payment instructions to the entity identified in the provider’s commercial documentation. The terms should be reviewed for renewal, cancellation, refund, resource-use, and service-availability conditions. Contact details should be confirmed through an independently obtained channel, and payment methods offering ordinary purchaser protection should be preferred for initial transactions.

EVIDENCE

- The site publishes terms-of-service and support-center navigation.
- The contact page provides a telephone number, email channel, and office address.
- The account and order workflows are the relevant points for validating billing, renewal, and credential-handling practices.

Summary Verdict

The overall posture is high trust and low risk, with the available evidence consistent with an established, apparently legitimate website and no observed scam or impersonation contradictions. Confidence is strong but not conclusive because the operator’s real-world identity has not been independently verified.

Infrastructure Integrity

The website benefits from CDN/WAF protection, with the observed edge address 51.210.72.59 associated with AS16276 and OVH - OVH SAS, FR; no origin-server candidate was identified in this analysis. This infrastructure reduces direct exposure of the origin and is a mitigating security signal, but it does not independently establish operator identity.

Closing Assessment

Ordinary commercial engagement is reasonable, subject to independent confirmation of the billed entity, service terms, contact channels, and payment protections before credentials or funds are provided.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100

Identity verification confidence	76%
----------------------------------	-----

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of shujaahost.co.ke.

- The request stayed on shujaahost.co.ke. It was not redirected to another domain. [CLEAR](#)
- Registration is published under KWE Holding Limited. [CLEAR](#)
- DNS for this domain is served by co.ke, across 2 name servers. [NOTED](#)
- The registration is paid up to 2027-02-08. [NOTED](#)
- The earliest public archive of this site is from 2017-05-12. [CLEAR](#)
- It is hosted on OVH, from a server in FR. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about shujaahost.co.ke at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
