

Is sigecloud.com.br legit? TrustSniffer's high-trust assessment: 90/100

sigecloud.com.br

Verdict

90

OUT OF 100

HIGH TRUST

sigecloud.com.br appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-12 by automated analysis. Classification confidence 70%.

What this site appears to be

Marketing and product landing page for SIGE Cloud, a Portuguese-language ERP SaaS. Describes features, pricing tiers, integrations, free 15-day trial, contact numbers and support resources. No evident requests for sensitive credentials or direct financial deposit flows on the page snapshot.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2013.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

SIGE Cloud is a Portuguese-language commercial SaaS website presenting an online enterprise resource planning (ERP) ecosystem for businesses, with finance, fiscal, inventory, point-of-sale, e-commerce, payments, sales, integrations, support resources, tiered subscriptions, and a free 15-day trial.

Scam/Impersonation Risk

No contradictions were observed. The homepage presents a coherent software-as-a-service offering rather than a phishing or impersonation flow, and the supplied page analysis found no malicious, suspicious, or brand-impersonation indicators. It also found no sensitive credential-collection form, hidden form, wallet connection, or direct deposit request on the captured page. The site's established registration continuity, sustained archival presence, clean external reputation, and established traffic footprint are consistent with an apparently legitimate operating website, although the real-world operator identity remains independently unverified.

EVIDENCE

- The homepage identifies SIGE Cloud as an ERP and business-management platform, with finance, fiscal, inventory, point-of-sale, e-commerce, sales, and support functionality.
- External reputation checks recorded 0 malicious detections, 0 suspicious detections, no malicious safe-browsing result, 0 abuse reports, and a whitelisted CDN usage classification.
- The domain registration record shows creation on 2013-04-23 and an age of 13.31 years.
- Web-archive records show 192 snapshots from 2013-08-07 through 2026-05-19, covering 14 years with a maximum gap of 1 year.

Regulatory Verification Notes

The website's apparent business model is ordinary commercial SaaS: paid ERP plans, optional payment-processing and related services, and implementation or professional support. The homepage also presents financial-service features, including a business account, transfers, boletos, and credit pricing; these claims should therefore be distinguished from any independently verified regulatory authorization. The captured site content does not display a license or registration number, and the available evidence does not independently verify the operator behind the SIGE Cloud brand. This is a regulatory and identity-verification gap, not evidence of a scam or identity contradiction. A registration record names SIGE CLOUD SISTEMAS DE GESTÃO LTDA - ME, but that record alone does not establish that the website is controlled by the named entity.

EVIDENCE

- The homepage advertises tiered ERP plans, a free 15-day trial, payment functionality, and business-support services.
- The site's hosting infrastructure is identified as AS13335, operated by Cloudflare, Inc.
- The site's TLS certificate is issued by WE1 with Domain Validation (DV), valid through 2026-11-04.
- The homepage content supplied for review contains no displayed license number or regulatory-registration disclosure.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the legal entity associated with the service, review the applicable subscription, cancellation, refund, and data-processing terms, and confirm that any payment-related activity is covered by the appropriate contractual and regulatory arrangements. Contact details and support channels should be validated through an independent route, and payment methods should provide ordinary transaction and dispute protections.

EVIDENCE

- The homepage provides commercial plan information and a free-trial pathway, creating a clear basis for reviewing subscription and cancellation terms.
- The homepage presents payment-related services alongside the ERP offering, warranting separate confirmation of the responsible legal entity and applicable authorization.
- The site includes contact and support resources that can be cross-checked independently before account or payment activity.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture. No scam, phishing, impersonation, or other contradictory signal was identified, but independent verification of the real-world operator remains incomplete.

Infrastructure Integrity

The website is protected by Cloudflare's CDN and WAF, with observed service resolution through Cloudflare edge infrastructure and potential origin candidates. This provides a meaningful layer of exposure mitigation and traffic filtering, but it is a protective infrastructure characteristic rather than proof of business legitimacy.

Closing Assessment

Normal evaluation of the service is proportionate to the available evidence; independent checks of contractual terms, merchant identity, and payment protections should precede credential submission or paid engagement.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sigecloud.com.br.

- The request stayed on sigecloud.com.br. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2034-04-23. [CLEAR](#)
- The earliest public archive of this site is from 2013-08-07. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sigecloud.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
