

Is sikayetvar.com legit? TrustSniffer's high-trust assessment: 90/100

sikayetvar.com

Verdict

90

OUT OF 100

HIGH TRUST

sikayetvar.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Şikayetvar is a Turkish consumer-complaint site listing user complaints and brand pages, offering complaint submission, brand response features, and TrustBuy ratings. The page contains consent/cookie management text and many complaint entries; no evidence of credential or payment harvesting in the supplied content.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2001.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Overview

sikayetvar.com is a Turkish consumer-complaint and review platform that presents user-submitted complaints, brand pages, response and resolution features, and TrustBuy ratings, with an apparent business model based on advertising, enterprise tools for brands, and promoted platform features.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or conflicting-identity indicators were observed. The homepage contains a login form and a complaint-submission form, but the supplied content shows no sensitive form directed to an untrusted destination, no credential or payment harvesting, and no wallet or clipboard-abuse behavior. One isolated external malicious classification was recorded, but the available attribution treats it as unconfirmed and it is not corroborated by the broader reputation, page, or behavioral evidence. The overall evidence therefore remains consistent with an established, apparently legitimate website.

EVIDENCE

- The homepage presents consumer complaints, brand responses, resolution tracking, and TrustBuy features; its content analysis recorded no red flags.
- The homepage's two forms are identified as login and complaint submission, with no sensitive external form or hidden form detected.
- The domain was registered on 2001-03-10 and is 25.44 years old.
- The site has 3,730 archive snapshots spanning 2001–2026, covering 26 years with a maximum observed gap of 1 year.

Regulatory Verification Notes

The platform's apparent informational and consumer-review function does not, on the supplied evidence, establish a requirement for financial authorization. However, the available site content does not state a regulated license, licensing authority, or license number, so the legal entity and any applicable regulatory status remain matters for independent confirmation. The registration record identifies Network Solutions, LLC as registrar and PERFECT PRIVACY, LLC as the registrant service; this is an administrative registration detail rather than evidence of misconduct. The site's established operating history, substantial public content, strong traffic footprint, valid transport encryption, and clean corroborating reputation materially support its apparent legitimacy, while not independently proving the real-world operator's identity.

EVIDENCE

- The hosting telemetry records AS13335, Cloudflare, Inc., US, as the hosting provider.
- The site uses a valid DV TLS certificate issued by WE1, valid to 2026-10-04T17:49:13+00:00.
- The homepage contains extensive complaint and brand-review content and identifies the service as an informational consumer-review platform.
- The site is ranked 6722 in the observed global traffic dataset and is within the top 1 million sites.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the operator's legal identity through official corporate or merchant records, review the site's terms and complaint-handling provisions, and confirm that any payment process provides appropriate consumer protections. If a specific service or commercial relationship is proposed, its contractual counterparty and applicable regulatory status should be checked with the relevant official registry. Official support and contact channels should also be confirmed through an independent route rather than relying solely on an unsolicited message or embedded link.

EVIDENCE

- The homepage provides account-login and complaint-submission functions, making account and data-handling terms relevant to review.
- The stated business model includes advertising, enterprise brand-management services, and promoted TrustBuy features.
- No license claim, licensing authority, or license number is present in the supplied site evidence.

Summary Verdict

The overall posture is **high trust and low risk**, with strong evidence of a mature, continuously operating consumer-information service and no observed scam or impersonation contradictions. The website is apparently legitimate and evidence-consistent with an established platform, although independent operator identity verification remains incomplete.

Infrastructure Integrity

The site is protected by Cloudflare's CDN/WAF infrastructure, with observed edge-serving behavior and a managed hosting posture. This reduces direct exposure of the underlying service and is a meaningful technical mitigation, but it is treated as infrastructure protection rather than proof of organizational legitimacy.

Closing Assessment

Ordinary browsing and review of publicly available content are proportionate; account or payment activity should proceed after the standard independent identity, terms, and payment-protection checks appropriate to the intended interaction.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sikayetvar.com.

- The request stayed on sikayetvar.com. It was not redirected to another domain. CLEAR
- Registration is published under Network Solutions, LLC. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2030-03-10. CLEAR
- The earliest public archive of this site is from 2001-04-11. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sikayetvar.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
