

Is siplcgi.com a scam? TrustSniffer's high-risk assessment: 0/100

siplcgi.com

Verdict

0

OUT OF 100

CRITICAL RISK

siplcgi.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-08-19 by automated analysis. Classification confidence 55%.

What this site appears to be

Company site for SIPL (ropeway manufacturer) describing services, team biographies, project experience, contact details and address. Appears to be an informational corporate presence with no login or financial solicitation.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

What siplcgi.com served when TrustSniffer captured it on 2026-08-19. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: 3 to 10 years (registration continuity).
- Public web-archive history exists since 2023.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents SIPL as an informational engineering and manufacturing company serving the aerial-ropeway sector, with descriptions of ropeway installation, engineering services, project experience, team biographies, and contact information for prospective government and private-sector clients.

Scam/Impersonation Risk

The site's visible content is consistent with a corporate ropeway supplier and does not show a login page, credential-collection form, financial solicitation, cryptocurrency activity, or other on-page abuse pattern. However, this benign presentation is materially outweighed by confirmed external threat detections and blacklist status: the domain is blacklisted, with malicious classifications reported by multiple external sources, including Fortinet and Sophos. The real-world operator identity remains unverified, so the corporate presentation should not be treated as proof of the represented entity. No separate identity contradiction or brand-impersonation finding was established.

EVIDENCE

- The homepage presents SIPL's ropeway installation, engineering, tourism, and project-service activities, together with biographies for named management personnel.
- External reputation evidence records 16 malicious detections and a confirmed blacklist, with Fortinet and Sophos identified among the flagged vendors.
- Domain registration evidence records creation on 2021-11-24 through GoDaddy.com, LLC, with an age of 4.74 years.

Regulatory Verification Notes

The reviewed pages describe commercial engineering, supply, and installation services rather than a regulated financial product. They do not provide a license number, regulatory registration, or clearly documented legal-entity identifier; this is a disclosure gap requiring independent confirmation, not by itself evidence of a scam. The site's identity claims remain unverified, and the available content quality is weakened by the default-style title "Just another WordPress site," missing structured metadata, and limited externally linked context. The external blacklist finding is a significant reputational warning, but it is not a licensing or regulatory determination.

EVIDENCE

- Hosting evidence identifies AS394695, PUBLIC-DOMAIN-REGISTRY - PDR, US.
- The site uses a DV TLS certificate issued by YR1, valid through 2026-11-11T10:22:16+00:00.
- The homepage title is "siplcgi – Just another WordPress site," and no structured data was detected.
- The reviewed corporate content describes contracted ropeway engineering, equipment supply, and installation services, without displaying a license authority or license number.

What to Verify Next

Before any commercial engagement, the proposed counterparty should be matched independently to the relevant corporate registry, procurement records, project references, and the legal identity of the contracting entity. Any claimed ISO certification, government relationship, project history, or management affiliation should be confirmed through the issuing body or an independently obtained official contact route. Payment instructions and contractual beneficiary details should be validated through a separate channel, and no sensitive credentials should be submitted to the site.

EVIDENCE

- The About and Contact pages provide the names, biographies, business description, address, and contact details that require independent corroboration.
- The homepage refers to an ISO certificate and government or private-sector ropeway projects without supplying independently verifiable certification or project documentation in the reviewed content.

Summary Verdict

The overall posture is **critical trust risk**. Although the website appears superficially consistent with an informational corporate business, the confirmed external malicious detections and blacklist status create a

substantial basis for treating sensitive interaction with the domain as unsafe, while the underlying operator identity remains unverified.

Infrastructure Integrity

The site resolves to a single likely origin address, with no CDN or WAF detected and no edge-IP layer identified. The transport encryption is a mitigating technical control for connection confidentiality, but it does not validate the operator or offset the external reputation findings.

EVIDENCE

- Infrastructure resolution records 1 unique IP, 0 edge IPs, and 1 likely origin IP.
- No CDN was detected; the site is directly associated with its resolved hosting infrastructure.
- The resolved server address is 216.10.241.123 in India.

Closing Assessment

The domain should not be used for login, credential submission, financial activity, or execution of a commercial transaction unless the counterparty and all transaction details have first been independently authenticated through trusted offline or separately sourced channels.

Written analysis generated 2026-08-19 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE
- The registration record withholds contact details for the operator.

Registration and ownership rule:KF_WHOIS_HIDDEN

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.

Analysis engine signal:direct_threat
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of siplcgi.com.

- The request stayed on siplcgi.com. It was not redirected to another domain. CLEAR
- Registration is published under GoDaddy.com, LLC. CLEAR
- DNS for this domain is served by domaincontrol.com, across 2 name servers. NOTED
- The registration is paid up to 2026-11-24. NOTED
- The earliest public archive of this site is from 2023-08-25. CLEAR
- It is hosted on PUBLIC-DOMAIN-REGISTRY, from a server in IN. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about siplcgi.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
