Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- VirusTotal and Google Safe Browsing had no flags for this domain; its hosting IP carries AbuseIPDB reports below the confidence level TrustSniffer treats as a flag.

Full analysis

Overview

This website is an institutional portal for Sistema Indústria, presenting information about CNI, SESI, SENAI, and IEL, together with industry policy, education and training, business services, events, statistics, publications, news, and transparency resources. Its apparent purpose is to provide organizational information and public-facing services rather than direct consumer commerce.

Scam/Impersonation Risk

No phishing, malicious-content, blacklist, brand-impersonation, or conflicting-identity indicators were observed. The homepage's institutional content, named organizational units, contact information, and social-channel presence are coherent with an established industry portal. Behavioral inspection did record hidden forms during both observed runs, but no login form, password-bearing external form, wallet activity, or other sensitive transaction mechanism was identified; this is a technical implementation anomaly rather than evidence of impersonation. A single abuse report concerns the shared Microsoft hosting infrastructure rather than an identified site-specific threat, and therefore does not establish malicious use by the website.

EVIDENCE

- The homepage identifies Sistema Indústria and its CNI, SESI, SENAI, and IEL organizations while presenting industry, education, events, and business-service content.
- The domain registration record shows registration on 1999-12-08 and an age of 26.69 years.
- The homepage's behavioral inspection detected hidden forms in 2 of 2 runs, with 0 password-bearing external forms and 0 wallet-provider or wallet-drainer runs.
- The hosting IP record shows 1 abuse report with confidence score 2, attributed to shared infrastructure operated by Microsoft Corporation.

Regulatory Verification Notes

The site presents itself as an institutional and educational organization, not as a financial intermediary or investment platform. Its homepage includes organizational references and a transparency area, but the supplied content does not identify a licensing authority or license number; this is a disclosure point for ordinary institutional verification, not evidence of a scam. The available evidence is consistent with the apparent institutional identity, although the real-world operator has not been independently verified. No matching third-party broker-reputation record was identified.

EVIDENCE

- The homepage names Confederação Nacional da Indústria and the Sistema Indústria organizations CNI, SESI, SENAI, and IEL.
- The homepage navigation includes “Transparência,” alongside services, publications, events, and news.
- The site uses a valid DV TLS certificate issued by YR2, valid through 2026-10-04.
- The website is served through a Microsoft-controlled infrastructure endpoint on AS8075, Microsoft Corporation, US.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the relevant CNI or Sistema Indústria affiliation through an official offline or separately sourced channel, review the applicable service terms and privacy provisions, and confirm any applicable institutional registration or authorization with the relevant registry. Contact channels should be validated through independently obtained official contact details rather than relying solely on page content.

EVIDENCE

- The homepage provides organizational names, a physical contact/address reference, and links to Facebook, X, LinkedIn, YouTube, Instagram, and Threads.
- The site is categorized as informational and institutional, with no detected login form, sensitive form, or direct cryptocurrency functionality.
- The available content describes services, education, events, statistics, and news rather than a direct retail or investment transaction model.

Summary Verdict

The overall posture is **high trust and low risk**, with the available evidence consistent with an established, apparently legitimate institutional website. The classification is strong, while the operator's real-world identity remains likely rather than independently proven.

Infrastructure Integrity

The website is protected by a CDN/WAF layer, with the observed address belonging to an edge server and no origin candidate identified in this analysis. This arrangement is a positive defensive control because it reduces direct origin exposure, although it remains a mitigating infrastructure signal rather than proof of legitimacy.

Closing Assessment

Standard informational use is proportionate; credential or payment interactions should follow ordinary independent checks of the organization, applicable terms, and available payment protections.

Written analysis generated 2026-08-11 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Signals weighed against the site

- AbuseIPDB: 1 report on hosting IP 4.228.32.37 (Microsoft Corporation, Data Center/Web Hosting/Transit), 2% confidence. The reports are attributed to shared infrastructure, not specifically to this website.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sistemaindustria.portaldaindustria.com.br.

- The request stayed on sistemaindustria.portaldaindustria.com.br. It was not redirected to another domain.

CLEAR
- DNS for this domain is served by f5clouddns.com, across 2 name servers.

NOTED
- The registration is paid up to 2029-12-08.

CLEAR
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sistemaindustria.portaldaindustria.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
