Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

SK Telecom's corporate website presents an established telecommunications and technology business, with company information, investor relations, sustainability programs, AI and technology initiatives, consumer and enterprise services, recruitment, newsroom content, and links to official social channels.

Scam/Impersonation Risk

No contradictions were observed. The homepage consistently presents SK Telecom's corporate identity and business activities, with no phishing forms, brand-impersonation indicators, deceptive behavior, or malicious reputation findings. Its structured corporate content, official social links, stable behavior, and clean external reputation support the conclusion that this is the legitimate SK Telecom website. A contact-channel integrity anomaly was not identified in the supplied evidence.

- The homepage identifies SK Telecom and provides company, investor, sustainability, recruitment, newsroom, and service sections.
- The homepage contains no login form, sensitive form, hidden form, wallet connection, or suspicious script behavior.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.

Regulatory Verification Notes

The site provides substantial corporate disclosure through company history, governance, investor relations, financial information, sustainability, information security, and compliance-related sections. No specific telecom license or registration number is supplied in the evidence; this is a limited disclosure point for regulatory verification, not an identity contradiction. The domain is long-established, registered through Gabia, Inc., and supported by a clean global web presence and valid extended-validation transport encryption.

- The corporate navigation includes company history, investor information, financial reports, governance, sustainability, ethics, compliance, and information-security pages.
- Registered 1997 (~29.43 years old) through Gabia, Inc.
- Hosted on AS8075 (Microsoft Corporation, US).
- TLS certificate issued by Sectigo RSA Extended Validation Secure Server CA (EV), valid to 2026-09-11.

What to Verify Next

For regulated procurement or telecom-specific engagements, confirm the applicable corporate and operating registrations through the relevant official registry and validate transaction contacts through an independently

sourced SK Telecom channel.

- The homepage links to official SK Telecom newsroom and social-presence destinations.
- The site exposes investor, governance, compliance, and corporate-information sections suitable for independent entity verification.
- The supplied evidence contains no specific license number or regulator reference to validate.

Summary Verdict

The website presents as a legitimate, established, and trustworthy corporate entity with a coherent business identity, mature disclosure structure, clean reputation, and no observed contradiction or impersonation signal. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

The observed hosting infrastructure is Microsoft-operated and the site uses a valid EV certificate issued by Sectigo. No confirmed CDN or WAF layer is identified in the supplied infrastructure evidence; this is an infrastructure characteristic, not a negative trust finding.

Closing Assessment

Standard business interaction is appropriate, with any additional registry checks reserved for engagements requiring formal regulatory or procurement assurance.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	76/100
Identity verification confidence	76%

- Trusted social count=2

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sktelecom.com.

- The request stayed on sktelecom.com. It was not redirected to another domain. CLEAR
- Registration is published under Gabia, Inc.. CLEAR
- DNS for this domain is served by sktelecom.com, across 4 name servers. NOTED
- The registration is paid up to 2027-03-04. NOTED
- It is hosted on MICROSOFT-CORP-MSN-AS-BLOCK, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sktelecom.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
