

Is skyblock-addons.com safe? TrustSniffer's moderate-trust assessment: 5/100

skyblock-addons.com

Verdict

5

OUT OF 100

CRITICAL RISK

skyblock-addons.com shows high-risk / scam indicators.

This assessment found strong scam indicators. Do not pay, sign in, or share personal details with this site.

Sensitive Interaction Risk

Governance Risk

Assessed 2026-09-30 by automated analysis. Classification confidence 55%.

What this site appears to be

Project site for an unofficial SkyblockAddons fork: free, open-source Fabric builds (26.3/26.2), feature list, screenshots, download and install instructions, and FAQ. Not affiliated with Hypixel or Mojang per the site copy.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

At a glance

The page as captured

<https://skyblock-addons.com/>

What skyblock-addons.com served when TrustSniffer captured it on 2026-09-30. The page may look different now.

Key findings

- Automated classification: Sensitive Interaction Risk.
- Domain age: less than 1 year (registration continuity).
- Public web-archive history exists since 2026.
- At least one reputation service TrustSniffer consulted had flagged this domain at assessment time.

Full analysis

Security Alert

Fortinet, Kaspersky, Sophos flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

The website presents itself as an unofficial SkyblockAddons fork for Minecraft, offering free, open-source Fabric builds for versions 26.3 and 26.2, with feature descriptions, screenshots, download links, installation instructions, and an FAQ. Its apparent purpose is software distribution and community use rather than commercial or financial activity.

Scam/Impersonation Risk

The site's own content is consistent with a software project and explicitly states that it is not affiliated with Hypixel or Mojang. However, this benign presentation is outweighed by confirmed external threat detections: the domain is blacklisted by multiple sources, and several major security providers classified it as malicious or suspicious. The available evidence does not establish a confirmed brand impersonation or phishing page, but the combination of confirmed blacklisting and a newly registered domain creates a serious risk for downloading or executing software from the site.

EVIDENCE

- The homepage describes an unofficial SkyblockAddons fork, free open-source Fabric builds, downloads, installation instructions, and non-affiliation with Hypixel or Mojang.
- External reputation checks recorded 11 malicious and 3 suspicious detections from 19 evaluated results, with Fortinet, Kaspersky, and Sophos among the reporting providers.
- The domain registration record shows creation on 2026-03-30 and an age of approximately 0.5 years.

Regulatory Verification Notes

This is presented as a software project rather than a regulated financial service, so financial licensing is not inherently expected. Nevertheless, the available pages do not independently identify a real-world operator, corporate entity, or accountable publisher, and the site's open-source and community-contribution claims should not be treated as proof of software provenance. The registration record uses Internet Domain Service BS Corp. and lists Domain Admin and Whois Privacy Corp.; this is an administrative registration detail, not evidence of legitimacy. The absence of a third-party broker match provides no positive regulatory assurance.

EVIDENCE

- The homepage identifies the project as an unofficial fork and does not provide an independently verified legal-entity identity in the supplied page content.
- The registration record names Internet Domain Service BS Corp. as registrar and lists Domain Admin and Whois Privacy Corp. for registrant details.
- The supplied third-party broker intelligence contains no matching record; this does not constitute licensing or regulatory approval.

What to Verify Next

Before any download or installation, the prospective user should independently confirm that the project publisher, source code, release files, and file hashes correspond through an established official project channel. The download should be examined with current endpoint security controls and, where feasible, tested in an isolated environment rather than on a primary gaming or work system. Any claimed association with Hypixel, Mojang, or a recognized open-source project should be confirmed through those organizations' own published channels.

EVIDENCE

- The homepage provides direct download and installation instructions but the supplied analysis found no external links or social domains establishing publisher continuity.
- The site presents a "1.17M+ Downloads" counter and "50+ Features" claim; these are on-page assertions and are not independently corroborated in the supplied evidence.
- The page has no login form, sensitive form, wallet connection, external posts, or external XHR activity in the observed runs, which narrows the immediate interaction surface but does not validate downloaded files.

Summary Verdict

The website has a credible-looking software-project presentation but an unacceptable trust posture for sensitive interaction or software acquisition. Confirmed blacklist and malicious-detection signals materially outweigh the site’s benign content and stable observed behavior, while the operator’s real-world identity remains unverified.

Infrastructure Integrity

The site is protected by Cloudflare CDN/WAF infrastructure, which provides a mitigating layer against direct exposure and can improve transport and edge resilience; it is not proof of publisher legitimacy. The observed address was an edge address, and independent origin verification was not available from the supplied infrastructure evidence.

EVIDENCE

- Served through AS214351, associated with FEMOIT - FEMO IT SOLUTIONS LIMITED, GB; observed edge address 196.251.107.204.
- TLS uses issuer YR2 with Domain Validation (DV), valid through 2026-12-20.
- Infrastructure facts identify Cloudflare CDN/WAF protection and no observed origin candidate.

Closing Assessment

The proportionate course is to defer downloading or executing files until publisher identity, release provenance, and file integrity have been independently confirmed; if use is unavoidable, it should be limited to an isolated, monitored environment with current endpoint protection.

Written analysis generated 2026-09-30 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, analysis engine, external reputation.

01 Governance Risk

- Registration details are held behind a privacy service, so no operator is named publicly. This is common and legal, and it also means there is nobody to check.

Registration and ownership rule:KF_WHOIS_PRIVATE

02 Sensitive Interaction Risk

- The analysis matched a pattern TrustSniffer treats as a direct threat to a visitor.
- An external threat feed lists this domain: either Google Safe Browsing marked it malicious, or a significant number of malware engines flagged it.

Analysis engine signal:direct_threat

External reputation rule:EXT_BLACKLIST_CRITICAL

Identity verification

Status

UNVERIFIED

Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of skyblock-addons.com.

- The request stayed on skyblock-addons.com. It was not redirected to another domain. [CLEAR](#)
- Registration is published under Internet Domain Service BS Corp.. [CLEAR](#)
- DNS for this domain is served by cloudflare.com, across 2 name servers. [NOTED](#)
- The registration is paid up to 2028-03-30. [CLEAR](#)
- The earliest public archive of this site is from 2026-09-29. [CLEAR](#)
- It is hosted on FEMOIT, from a server in SC. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about skyblock-addons.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
