

Is skymoders.top safe? TrustSniffer's moderate-trust assessment: 65/100

skymoders.top

Verdict

65

OUT OF 100

MODERATE TRUST

skymoders.top is moderately trusted.

Most signals looked ordinary, and some evidence was missing. Read the checks below before you pay or hand over personal details.

Governance Risk

Dynamic Interaction Caution

Assessed 2026-09-20 by automated analysis. Classification confidence 55%.

What this site appears to be

Community-focused web page listing Hypixel SkyBlock mods and modpacks compatible with Fabric 26.1.2, including modpack descriptions, download options, and feature categories (performance, QoL, automation).

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Hypixel SkyBlock Mods

Fabric 26.1.2 · QoL mods · Macros · Dungeons ·
Modpack

What skymodders.top served when TrustSniffer captured it on 2026-09-20. The page may look different now.

Key findings

- Automated classification: Governance Risk.
- Domain age: less than 1 year (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

This website is a community-oriented Minecraft resource portal presenting curated Hypixel SkyBlock mods, Fabric 26.1.2 modpacks, performance and quality-of-life tools, automation clients, feature categories, and download options. Its apparent business model is community distribution supported potentially by advertising or donations rather than direct financial services or investment activity.

Scam/Impersonation Risk

No phishing, impersonation, blacklist, or other direct contradiction was identified. The homepage presents a coherent gaming-modification purpose, including named resources such as SkyBlock Enhanced, NovaClient Modpack, Taunahi, Polar Client, and performance tools, with no login form, sensitive form, wallet interaction, or credential-harvesting behavior observed. The principal user-facing risk is software supply-chain exposure: the page promotes downloadable modpacks and automation clients, including scripts for farming, slayer, mining, and other in-game activities, so downloads should be assessed for provenance and integrity even though no malicious behavior was detected. The domain is newly registered, which limits the available operating track record but is not itself evidence of deception.

EVIDENCE

- The homepage is titled “SkyBlock Mods — Hypixel 26.1.2 Fabric Hub” and describes modpacks, macros, dungeons, automation, and performance resources.
- The homepage contained no login form, sensitive form, hidden form, wallet connection, clipboard activity, or suspicious inline scripts during behavioral testing.
- External reputation checks reported zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- Domain registration records show registration on 2026-08-07 and an age of approximately 0.12 years.

Regulatory Verification Notes

This is an informational download portal rather than a site presenting a regulated financial service. The available page content does not independently establish the real-world operator, and the site's governance and ownership disclosures remain unclear; therefore, legitimacy is apparent from the content and behavior but the operator identity is unverified. No licensing claim or regulatory authorization is relevantly established by the supplied page evidence. The site's transport and hosting arrangements provide baseline technical integrity, while the external reputation signals are favorable but do not substitute for operator identification or software provenance checks.

EVIDENCE

- The homepage identifies the service as a Hypixel SkyBlock and Fabric 26.1.2 mod hub but does not identify a verified corporate or individual operator in the supplied content.
- The site is served on AS13335 through CLOUDFLARENET - Cloudflare, Inc., US.
- The transport certificate is issued by WE1 with DV validation and is valid to 2026-11-05T01:13:55+00:00.
- The registered registrar is PDR Ltd, with the registration period recorded as 2026-08-07T01:09:48Z to 2027-08-07T01:09:48Z.

What to Verify Next

Before installing software, obtain packages through the project's official distribution channel where available and compare published hashes or signatures. Confirm that any referenced projects are the genuine upstream projects and that the intended launcher, mod versions, and permissions match the stated functionality. For any donation or advertising interaction, independently confirm the recipient and payment destination rather than relying solely on the portal's presentation. The operator should also be contactable through independently corroborated official channels.

EVIDENCE

- The homepage directs users toward Modrinth App or Prism Launcher, creating a concrete basis for checking package provenance through recognized project channels.
- The listed resources include executable modpacks, clients, macros, and automation scripts, making integrity and permission review material to the installation decision.
- The page contains no sensitive submission form, so verification should focus on downloaded software and any external destinations reached through download controls.

Summary Verdict

The site has a **moderate-trust posture**: its purpose and observed behavior are consistent with a community gaming-mod portal, and no direct indicators of phishing, impersonation, or malicious activity were found. Confidence is limited because the operating identity is not independently verified and the service has only a limited registration history.

Infrastructure Integrity

Cloudflare CDN/WAF protection provides a mitigating layer between the site and visitors, and all observed addresses were Cloudflare edge infrastructure on AS13335; an origin server was not observable in this analysis. This supports transport and network resilience but does not independently validate the operator or the files distributed by the site.

Closing Assessment

Ordinary browsing and low-impact evaluation are reasonable, while software installation, external payments, or other sensitive actions should proceed only after the relevant package, destination, and operator details have been independently corroborated.

Written analysis generated 2026-09-20 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

2 findings contributed to this verdict, raised by registration and ownership, behaviour in a sandbox.

- 01 Governance Risk

 - The public registration record for this domain is incomplete.
Registration and ownership rule:KF_WHOIS_INCOMPLETE
- 02 Dynamic Interaction Caution

 - The structure of the page changed sharply while it was loading.
Behaviour in a sandbox rule:BEHAV_DOM_DENSITY_SPIKE

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of skymoders.top.

- The request stayed on skymoders.top. It was not redirected to another domain. [CLEAR](#)

- Registration is published under PDR Ltd. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2027-08-07. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about skymoders.top at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
