

Is slickdeals.net legit? TrustSniffer's high-trust assessment: 90/100

slickdeals.net

Verdict

90

OUT OF 100

HIGH TRUST

slickdeals.net appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-10 by automated analysis. Classification confidence 75%.

What this site appears to be

Front page of a deals/coupons aggregator showing numerous retailer offers, promoted items, community-submitted deals, and links to categories and forums. Content emphasizes price discounts, affiliate/promoted tags, and community activity.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2000.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Slickdeals.net is a community-driven deals and coupons aggregator that presents retailer discounts, promo codes, user-submitted offers, promoted listings, deal alerts, forums, giveaways, and shopping-related content, with an apparent business model based on advertising, affiliate or referral fees, and sponsored placements.

Scam/Impersonation Risk

No contradictions were observed across the supplied evidence: there were no phishing, impersonation, malicious-reputation, or confirmed abuse indicators. The homepage presents a coherent ecommerce-content model, explicitly identifies promoted items and brand compensation, and shows community-submitted offers rather than making implausible financial or investment claims. The observed page behavior also showed no credential-harvesting pattern, hidden sensitive forms, wallet activity, clipboard manipulation, or cloaking. The site's long-established presence, substantial historical continuity, strong traffic footprint, and clean external reputation materially support an apparently legitimate and established-site assessment.

EVIDENCE

- The homepage is identified as "Slickdeals: The Best Deals, Coupons, Promo Codes & Discounts" and contains retailer offers, community submissions, forums, giveaways, and category navigation.
- The homepage states that the service is community-supported and may receive payment from brands for deals, including promoted items.
- Domain registration: 1999-11-10; age 26.77 years.
- Web archive: 5,000 snapshots spanning 2000–2014, covering 15 tracked years.

Regulatory Verification Notes

Slickdeals presents as a commercial deals and advertising platform rather than a regulated financial service. The supplied page evidence does not independently verify the real-world operator identity, and the site content does not provide a claimed regulatory license or license number; this is a transparency point for ordinary commercial due diligence, not evidence of a scam. The use of a long-established domain registered through Cloudflare, Inc., a high page-authority profile, and clean reputation findings provides substantial legitimacy context, while the site's apparent identity remains appropriately described as unverified rather than proven.

EVIDENCE

- Domain registrar: Cloudflare, Inc.; expiration date: 2029-11-10.
- TLS certificate: issuer YE1; validation level DV; valid to 2026-10-19.
- The homepage discloses an affiliate/promotional compensation model rather than presenting a regulated-service license claim.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm the merchant identity associated with any particular offer, review the applicable retailer's return and cancellation terms, and ensure that payment protection is provided by the named retailer or payment provider rather than relying solely on the aggregator. Contact and support channels should be confirmed through the site's own help and account-management paths and, for higher-value activity, through an independent offline route. Any regulated financial offer encountered through the site's finance-related content should be checked directly against the relevant regulator's public register.

EVIDENCE

- The homepage provides account-related functions including sign-up, log-in, and deal alerts, making account-boundary checks relevant before credential use.
- The site capture recorded no sensitive form and no external password-submission form.
- The homepage links to help, feedback, forums, and retailer-specific offers that can be cross-checked independently.

Summary Verdict

The overall posture is **high trust and low risk**, and the available evidence is consistent with an established, apparently legitimate website. This conclusion supports ordinary browsing and standard site use, while the absence of independent operator verification means it should not be treated as proof of a specific real-world legal entity.

Infrastructure Integrity

The site is delivered through Cloudflare's CDN/WAF infrastructure, with observed edge hosting on AS13335 operated by Cloudflare, Inc. This provides a meaningful protective layer against direct exposure and common delivery abuse, although infrastructure protection is a mitigating control rather than proof of organizational identity.

Closing Assessment

Normal use is proportionate to the evidence; credential or payment activity should follow the independent merchant, terms, contact-channel, and payment-protection checks outlined above.

Written analysis generated 2026-08-10 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	25%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of slickdeals.net.

- The request stayed on slickdeals.net. It was not redirected to another domain. CLEAR
- Registration is published under Cloudflare, Inc.. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2029-11-10. CLEAR
- The earliest public archive of this site is from 2000-03-01. CLEAR
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about slickdeals.net at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
