- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2016.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Sule Lamido University Kafin Hausa operates as a public higher-education website presenting academic faculties, admissions, research, university governance, student and staff portals, campus facilities, and institutional services. Its apparent purpose is to support university administration, education delivery, student access, and public institutional communication.

Scam/Impersonation Risk

No contradictions were observed. The homepage consistently identifies Sule Lamido University Kafin Hausa and presents ordinary public-university functions—academic programmes, admissions, research, facilities, news, and administration—with no investment solicitation, financial-return claims, phishing indicators, brand impersonation, or deceptive interaction patterns. The site's contact and portal references are consistent with its stated institutional purpose.

EVIDENCE

- The homepage identifies the institution and links to admissions, faculties, research, governance, facilities, and campus portals.
- Browser behavior recorded no hidden forms, external posting activity, wallet connections, clipboard manipulation, cloaking, or suspicious inline scripts.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist or phishing finding.
- The domain uses the academic `edu.ng` suffix and has 351 archive snapshots spanning 2016–2026, covering 11 tracked years.

Regulatory Verification Notes

The legal and governance material includes the university's law, leadership and governance information, strategic plan, financial statement, procurement plan, policies, and conditions of service. No specific licensing or registration number is presented in the reviewed institutional material; this is a limited disclosure point for administrative verification, not evidence of deception. The domain is long-established, and its technical and historical continuity support the conclusion that the website is an established institutional service.

EVIDENCE

- Domain registration: 2015-01-21; age 11.54 years.
- Hosted on AS22612 (NAMECHEAP-NET - Namecheap, Inc., US).
- TLS certificate issued by YR2 using DV validation, valid to 2026-10-01T20:21:49+00:00.
- The legal and governance pages provide institutional law, leadership, financial, procurement, and policy content.

What to Verify Next

For formal onboarding, the institution's current status and any applicable authorization should be confirmed through the relevant Nigerian education or public-sector registry. Contact details and admissions instructions should be cross-checked through an independently sourced institutional channel before high-value administrative transactions.

EVIDENCE

- The About section contains the university law, leadership and governance, strategic plan, financial statement, and procurement plan.
- Admissions pages provide undergraduate, postgraduate, international, and continuing-education pathways.
- The Contact section supplies institutional contact information and location details.

Summary Verdict

The website presents a legitimate, established, and trustworthy public-university presence with a coherent institutional purpose and no observed scam or impersonation indicators. Normal interaction, including account login and standard use of its university services, is appropriate.

Infrastructure Integrity

The site resolves to a single likely origin address hosted by Namecheap, Inc. in the United States, with no CDN detected. This is a conventional hosting arrangement, while the valid DV TLS certificate provides transport protection for routine web interactions.

Closing Assessment

Prospective users may proceed with normal university-related interaction, while formal institutional or financial commitments should follow the organization's standard independent verification procedures.

Written analysis generated 2026-08-02 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	55/100

Identity verification confidence	60%
----------------------------------	-----

- Identity verified on page

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of slu.edu.ng.

- The request stayed on slu.edu.ng. It was not redirected to another domain. CLEAR
- Registration is published under GO54 Limited (formerly Whogohost Limited). CLEAR
- DNS for this domain is served by go54.com, across 2 name servers. NOTED
- The registration is paid up to 2027-01-21. NOTED
- The earliest public archive of this site is from 2016-01-11. CLEAR
- It is hosted on NAMECHEAP-NET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about slu.edu.ng at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
