

Is smarthost.pl legit? TrustSniffer's high-trust assessment: 80/100

smarthost.pl

Verdict

80

OUT OF 100

HIGH TRUST

smarthost.pl appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Safe for Login

Low Risk

Assessed 2026-08-11 by automated analysis. Classification confidence 75%.

What this site appears to be

Official website of Smarthost — a Polish hosting provider offering shared hosting, VPS, dedicated servers, domain registration, free SSL, backups, and 24/7 support. Site includes pricing, product descriptions, certifications and contact information.

Evidence status and limitations

- Evidence completeness: UNKNOWN
- The real-world operator identity was not independently verified.
 - Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2007.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Smarthost.pl is the website of an apparent Polish hosting and domain-services provider, presenting shared hosting packages, VPS and dedicated servers, domain registration and transfer, SSL certificates, backups, security services, customer support, pricing, and account-management functions for consumer and business customers.

Scam/Impersonation Risk

No contradictions were observed: the available evidence shows no phishing, impersonation, blacklist, or malicious-reputation finding, and the site's stated hosting-services model is consistent across its homepage and service pages. The site presents concrete commercial offerings, pricing, contact information, certifications, and links to established social platforms rather than relying on speculative financial or investment claims. Automated interaction produced substantial page changes and some non-whitelisted external requests, but the observed behavior included no hidden forms, password-exfiltration forms, wallet-connect activity, clipboard manipulation, or cloaking; this is more consistent with a dynamic ecommerce and support interface than with a confirmed impersonation pattern.

EVIDENCE

- The homepage and service pages describe shared hosting, VPS, dedicated servers, domain services, SSL, backups, security features, and 24/7 support, with no fraud indicators recorded.
- External reputation checks evaluated the domain without malicious or suspicious detections; no phishing or impersonation match was identified.
- The domain was registered in 2006 and is approximately 20.24 years old.
- Web-archive records contain 585 snapshots spanning 2007–2026, covering 20 tracked years.

Regulatory Verification Notes

The website provides business and contact information, product pricing, service descriptions, and an ISO 27001 certification page, supporting the appearance of an established commercial hosting provider. The available material does not independently verify the real-world operator identity, so the site should be described as apparently legitimate rather than identity-proven. No regulated financial service is presented, and no regulatory license number or licensing authority is stated in the reviewed content; this is a limited disclosure point for ordinary commercial due diligence, not evidence of a scam. A separate broker-reputation dataset returned no match, which is contextual support only and not a licensing determination.

EVIDENCE

- The “About,” “Contact,” and certification pages identify Smarthost as a Polish hosting business and present a physical address, contact information, and an ISO 27001 certification claim.
- The homepage and pricing pages show subscription and one-time purchase mechanics for hosting, servers, domains, and ancillary services rather than a regulated investment product.
- The domain registrar is Smarthost Sp. z o.o.; registration runs from 2006-05-21T02:00:31Z to 2034-05-21T02:00:31Z.
- The site is hosted on AS39566 (AS-SMARTHOST-PL - Smarthost sp. z o.o., PL); its TLS certificate is DV, issued by GoGetSSL RSA DV CA, and valid to 2027-04-04T23:59:59+00:00.

What to Verify Next

Before credential or payment interactions, an organization should independently confirm that the legal entity named on the site matches the contracting and billing entity, review the applicable terms, cancellation and refund provisions, and confirm payment-protection options. If a regulated activity is contemplated outside the hosting services described, the relevant national registry should be checked for the specific service and entity. Official support and contact channels should also be confirmed through an independent, offline route before sensitive account changes or high-value purchases.

EVIDENCE

- The homepage includes links to the terms-relevant commercial areas, account panel, checkout, pricing, contact page, and service documentation.
- The site exposes four functional forms: contact, domain registration/search, checkout/payment, and support/chat; no sensitive login form was detected on the reviewed page.
- The service pages identify hosting, domain, backup, SSL, and support functions, providing concrete points for matching invoices, terms, and service entitlements.

Summary Verdict

Available evidence is consistent with an established, apparently legitimate website and supports a high-trust, low-risk posture for its stated hosting and domain-services business. The absence of observed contradictions supports normal consideration of the site, while the operator’s real-world identity remains likely rather than independently verified.

Infrastructure Integrity

The site resolves directly to a Smarthost-hosted origin in Poland, with no CDN or WAF detected in the supplied infrastructure evidence. That architecture provides less edge-layer separation than a CDN-backed deployment, but the resolved infrastructure is coherent with the provider’s own hosting business and is not, by itself, evidence of maliciousness.

Closing Assessment

Ordinary account and purchasing activity is proportionate to the assessed posture, subject to routine independent checks of merchant identity, applicable terms, refund arrangements, and payment protection before sensitive or financially consequential interactions.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	80/100
Identity verification confidence	80%

- Trusted social count=4

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of smarthost.pl.

- The request stayed on smarthost.pl. It was not redirected to another domain. CLEAR
- Registration is published under Smarthost Sp. z o.o.. CLEAR
- DNS for this domain is served by smarthost.pl, across 3 name servers. NOTED
- The registration is paid up to 2034-05-21. CLEAR
- The earliest public archive of this site is from 2007-01-12. CLEAR
- It is hosted on AS-SMARTHOST-PL, from a server in PL. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about smarthost.pl at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
