## The page as captured

---

No screenshot is retained for this report.

## Key findings

---

- Automated classification: Not Scam.
- Public web-archive history exists since 2015.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

## Full analysis

---

### Overview

The website is an established SM Markets online grocery storefront offering fresh food, pantry goods, household supplies, personal-care products, and related retail items at displayed Philippine-peso prices for same-day delivery or pickup.

### Scam/Impersonation Risk

No identity contradictions, brand impersonation, phishing indicators, or confirmed malicious reputation signals were observed. The homepage presents a coherent retail operation: named merchandise, unit sizes, ordinary pricing, discounts, cart functions, and account access align with the stated grocery business model. Its long-standing, continuous web presence further supports identity continuity, with no evidence of suspicious domain repurposing.

- The homepage displays specific retail inventory, including fresh produce, meat and seafood, pantry goods, health-and-beauty products, and household essentials, with prices and add-to-cart controls.
- The domain was registered in 2015 and is approximately 11.18 years old.
- The web archive contains 273 snapshots spanning 2015–2026, representing 12 years of tracked history with no detected semantic repurposing.
- Reputation telemetry recorded 0 malicious and 0 suspicious detections, no phishing indication, and an established global traffic position at rank 69,321.

### Regulatory Verification Notes

The supplied homepage content attributes the storefront to SM Markets and provides access to policies, FAQs, contact information, and account functions. It makes no claim to provide financial, investment, brokerage, or crypto services; its ordinary sale of consumer goods therefore does not present an apparent financial-licensing issue. The available evidence does not reproduce the full legal terms or corporate-registration particulars, leaving those formal disclosures outside the scope of this assessment rather than creating a legitimacy concern.

- The homepage identifies the service as “SM Markets | Same-day Delivery and Pick-up” and presents a conventional ecommerce sales model.
- The homepage provides policy, FAQ, contact, login or registration, delivery, and pickup pathways.
- The hosting infrastructure is served from AS54113 (Fastly, Inc., US).
- The site's transport encryption uses a DV TLS certificate issued by YR1, valid until 2026-10-27.

What to Verify Next

Institutional onboarding should confirm that the legal entity named in the site’s terms matches the intended merchant and payment recipient. Procurement teams should also review delivery coverage, cancellation and refund provisions, privacy handling, and accepted payment protections before establishing a commercial relationship. Official support channels can be confirmed independently where transaction value or operational dependency is material.

- The homepage offers both delivery and pickup, making service-area and fulfilment terms relevant to transaction planning.
- The storefront supports customer account access and shopping-cart activity, making its privacy and payment terms relevant to onboarding.
- Displayed discounts and product-level pricing provide a basis for checking that checkout totals and fulfilment terms remain consistent with the offer.
- Policy, FAQ, and contact links are presented on the homepage as the appropriate sources for these operational checks.

Summary Verdict

SM Markets is a legitimate, established, and trustworthy ecommerce website. Its coherent commercial identity, sustained historical presence, clean external reputation, meaningful traffic footprint, and benign observed behavior converge strongly in support of normal use, including account login and standard purchases.

Infrastructure Integrity

The site uses trusted content-delivery and protective edge infrastructure, with observations identifying Fastly-hosted addresses alongside Akamai and Cloudflare delivery or protection layers. All nine observed addresses were CDN edge endpoints; this architecture reduces direct exposure of the origin environment and is a mitigating security control, although infrastructure protection alone is not proof of legitimacy.

Closing Assessment

Prospective customers may interact with the site normally, while applying routine ecommerce controls such as reviewing checkout details, fulfilment terms, and payment protections before completing a purchase.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

|                                  |            |
|----------------------------------|------------|
| Status                           | UNVERIFIED |
| Identity score                   | 30/100     |
| Identity verification confidence | 50%        |

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

## What TrustSniffer observed

First-party facts recorded during the assessment of smmarkets.ph.

- The request stayed on smmarkets.ph. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2015-05-30. CLEAR
- It is hosted on FASTLY, from a server in US. NOTED

## About this assessment

A trust score summarises the evidence TrustSniffer could collect about smmarkets.ph at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
