- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2002.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Soccer Laduma is an established South African football news and media website presenting local and international football reporting, club and competition coverage, podcasts, videos, competitions, and advertising-supported audience services. Its apparent business model is editorial publishing funded through advertising, sponsorship placements, and consent-based personalized advertising.

Scam/Impersonation Risk

No contradictions were observed across the site content, historical record, technical evidence, or external reputation checks. The homepage presents a coherent sports-news publication rather than a deceptive financial, investment, or credential-harvesting service; its login form is not accompanied by hidden forms, external password submission, wallet activity, or other sensitive interaction indicators. Some browsing telemetry recorded external requests and posts, but these are consistent with advertising, analytics, consent management, and other publisher functionality rather than an identified phishing or impersonation mechanism. The site's long registration continuity and sustained historical presence further support an established provenance assessment.

EVIDENCE

- Domain registration record: registered 2000 (~26.59 years old), with expiration recorded for 2027-01-14.
- Web archive: 5,000 snapshots spanning 2002-08-09 to 2022-04-01, covering 21 years tracked.
- Homepage: extensive South African and international football editorial content, category navigation, podcasts, competitions, and no identified fraud indicators.
- Browser behavior: 2 successful runs; 0 wallet-connect runs, 0 wallet-sensitive runs, 0 wallet-drainer runs, 0 hidden forms, and 0 external password forms.

Regulatory Verification Notes

The site operates as a sports-news publisher and does not present itself as a regulated financial, investment, or brokerage service. Its pages show advertising and consent-management functionality, including a cookie-consent mechanism and third-party advertising or analytics activity. A registration record associates the domain with Media24 (Pty) Ltd through Lexsynergy Limited; this is a meaningful registration signal but does not independently verify the real-world operator identity. No licensing or registration number is presented in the reviewed site content, which is a limited disclosure point rather than evidence of a scam. No broker-reputation match was identified.

EVIDENCE

- Registration record: registrar Lexsynergy Limited; registrant organization Media24 (Pty) Ltd.
- Hosting: served from AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- Transport security: TLS certificate issued by Amazon RSA 2048 M01, validation level DV, valid to 2026-09-25.
- Homepage and navigation: identified as “South African soccer news | Soccer Laduma,” with editorial sections, team coverage, advertising consent controls, and contact details.

What to Verify Next

Before credential or payment interactions, independently confirm that the intended operator and official contact channels correspond to the publication identified on the site. For any account activity, check the authentication context and account-recovery process before submitting credentials. If a transaction or paid service is introduced, review the applicable terms, refund or return arrangements, and payment-protection options through an independent route.

EVIDENCE

- Contact-related site content: contact details are presented and can be checked against an independently obtained publisher contact route.
- Login surface: the site exposes a login function without a detected sensitive external form, supporting a focused authentication-context check.
- Business-model evidence: the reviewed pages describe editorial publishing, advertising, podcasts, videos, and competitions rather than a regulated financial offering.

Summary Verdict

The overall posture is **high trust and low risk**, with converging evidence consistent with an established, apparently legitimate website. The site’s real-world operator identity remains independently unverified, so legitimacy should be understood as evidence-consistent rather than proven.

Infrastructure Integrity

The observed hosting uses Amazon’s content-delivery infrastructure, providing a mainstream and technically established delivery environment. This is a mitigating infrastructure signal only and does not by itself establish the operator’s identity or business legitimacy.

Closing Assessment

Normal browsing is proportionate to the assessed posture; before entering credentials or making any payment, ordinary independent checks of the operator, applicable policies, and payment protections should be completed.

Written analysis generated 2026-08-12 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of soccerladuma.co.za.

- The request stayed on soccerladuma.co.za. It was not redirected to another domain. CLEAR
- Registration is published under Lexsynergy Limited. CLEAR
- DNS for this domain is served by awsdns-37.net, across 4 name servers. NOTED
- The registration is paid up to 2027-01-14. NOTED
- The earliest public archive of this site is from 2002-08-09. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about soccerladuma.co.za at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent

with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
