Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2012.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is Şok Market's Turkish online retail storefront, presenting priced groceries, beverages, household goods, personal-care products, electronics, promotions, customer accounts, and a loyalty or stored-value programme for ordinary consumer purchases and delivery.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other deceptive financial mechanics were observed. The homepage's coherent retail catalogue, transparent pricing, account functions, corporate and investor-information navigation, legal-policy access, customer-service content, and granular cookie controls align with an established ecommerce operation. This assessment is reinforced by a long-lived domain, substantial historical coverage, an established global traffic footprint, and clean results across the evaluated external threat-reputation sources.

- The homepage displays detailed product categories, named merchandise, prices in Turkish lira, promotional discounts, and ordinary retail account functions.
- The domain was registered on 25 August 2011 and is approximately 14.95 years old; registration extends to 24 August 2027.
- The web archive contains 746 snapshots spanning 11 April 2012 to 7 June 2026, covering 15 tracked years without evidence of suspicious repurposing or semantic drift.
- External reputation evidence records zero malicious and zero suspicious detections, no reported malicious classification, no abuse reports, and a global traffic rank of 62,580.

Regulatory Verification Notes

The observed business model is conventional ecommerce rather than a regulated financial, brokerage, investment, or crypto service. No licensing claim is therefore expected from the activities shown. The homepage provides navigation to corporate information, investor relations, and legal policies, although the supplied page evidence does not establish the detailed legal-entity disclosures contained within those destinations. No matching broker-reputation record was identified; that result has no bearing on the retailer's legal status.

- The homepage describes the service through grocery, household, personal-care, clothing, electronics, delivery, promotion, and customer-account functions, with no investment or brokerage offering.
- The homepage navigation visibly includes "Kurumsal," "Yatırımcı İlişkileri," and privacy and cookie-management facilities.

- The site's transport encryption uses a WE1-issued domain-validated TLS certificate, valid until 2 October 2026.
- The evaluated broker-intelligence context contains no matched broker entry.

What to Verify Next

For higher-value procurement or enterprise onboarding, the appropriate diligence is to compare the contracting entity and payment beneficiary against the corporate particulars published through the site's legal and investor-relations materials. Customer-service channels, refund conditions, delivery terms, and privacy notices should also be retained with the transaction record where institutional auditability is required.

- The homepage exposes corporate and investor-relations entry points suitable for confirming the contracting entity.
- Customer-service information and legal-policy navigation are presented within the storefront.
- Product pricing and promotional conditions are displayed directly alongside the relevant merchandise.
- Granular cookie controls provide an observable mechanism for managing tracking preferences.

Summary Verdict

This is a legitimate, established, and trustworthy retail website. Its coherent commercial identity, mature operating history, strong usage footprint, clean external reputation, and stable technical behaviour converge on a high-confidence assessment with no contradictory risk signals. Normal interaction, including account login, account management, and standard purchases, is appropriate.

Infrastructure Integrity

The website is protected by Cloudflare's CDN/WAF, and all four observed IPv4 and IPv6 addresses were Cloudflare edge endpoints rather than origin candidates. This reduces direct origin exposure and provides a meaningful infrastructure safeguard, while remaining supporting security evidence rather than independent proof of business legitimacy.

- The site is served from AS13335 (CLOUDFLARENET — Cloudflare, Inc., US).
- Hosting resolution identified four CDN edge addresses and no likely origin-server address.
- Behavioural testing completed two successful runs without cloaking, hidden forms, suspicious inline scripts, clipboard hijacking, or untrusted form destinations.

Closing Assessment

Prospective users may proceed with normal account and purchasing activity, applying standard ecommerce controls and transaction-record retention appropriate to the value and purpose of the purchase.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100

Identity verification confidence	50%
----------------------------------	-----

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sokmarket.com.tr.

- The request stayed on sokmarket.com.tr. It was not redirected to another domain. [CLEAR](#)
- DNS for this domain is served by cloudflare.com. [NOTED](#)
- The registration is paid up to 2027-08-24. [NOTED](#)
- The earliest public archive of this site is from 2012-04-11. [CLEAR](#)
- It is hosted on CLOUDFLARENET, from a server in US. [NOTED](#)

About this assessment

A trust score summarises the evidence TrustSniffer could collect about sokmarket.com.tr at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
