Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

Solumedia is a subscription-based media and hosting services website presenting internet radio, video streaming, web hosting, AutoDJ, statistics, SSL, and custom mobile applications for customers in Argentina, Chile, Uruguay, and other supported regions.

Scam/Impersonation Risk

No contradictions, phishing indicators, brand impersonation, malicious detections, or confirmed blacklist findings were observed. The homepage presents a coherent SaaS and hosting business model with service descriptions, monthly plans, support claims, and terms links; its content and observed behavior are consistent with ordinary commercial service delivery rather than credential theft or deceptive financial activity.

- The homepage describes internet radio, video streaming, web hosting, AutoDJ, and mobile-application services with subscription pricing.
- The homepage contains no login form, sensitive form, hidden form, wallet-connect behavior, or suspicious external submission.
- External reputation checks recorded zero malicious and zero suspicious detections, with no blacklist result.

Regulatory Verification Notes

The site appears to operate as a commercial technology and media-services provider rather than presenting a regulated financial offering. Its pages provide service and support information and link to terms, but do not state a regulatory licence or licence number; this is a limited disclosure point, not evidence of impersonation or fraud. No matching third-party broker-reputation record was identified.

- The homepage provides monthly service plans and regional support coverage but no regulatory licence claim or licence number.
- The homepage advertises “more than 15 years” of support for major media outlets as a business-track-record claim.
- Domain registration: 2013-09-09; approximately 12.9 years old; registrar: nicar.
- The site’s hosting infrastructure is served from AS13335 (Cloudflare); its TLS certificate is issued by WE1, uses DV validation, and is valid to 2026-09-20.

What to Verify Next

Before entering into a material commercial agreement, the prospective customer should confirm the contracting entity, applicable terms, billing identity, and support channels through the site’s published legal and contact

pages. If a particular service requires sector-specific authorization in the customer’s jurisdiction, that authorization should be checked with the relevant official registry.

- The homepage links visitors to service details, customer information, and terms.
- The advertised services and prices are presented directly on the homepage.
- The site’s transport encryption is currently supported by a valid DV certificate.

Summary Verdict

Solumedia presents as a legitimate, established, and trustworthy commercial technology-services website. The available evidence supports normal interaction, including account login and standard use, with no observed contradiction that would undermine its identity or security posture.

Infrastructure Integrity

Cloudflare provides the site’s CDN and WAF protection, and all observed addresses belong to Cloudflare edge infrastructure under AS13335; the origin server was not exposed in the observed configuration. This reduces direct origin exposure and is a mitigating infrastructure characteristic, although it is not by itself proof of legitimacy.

Closing Assessment

Normal account access and standard service engagement are appropriate, subject to ordinary commercial checks before any substantial contractual or financial commitment.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	LIKELY
Identity score	73/100
Identity verification confidence	74%

- Trusted social count=1

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of solumedia.com.ar.

- The request for solumedia.com.ar ended on solumedia.com, a different domain. WATCH
- Registration is published under nicar. CLEAR
- DNS for this domain is served by cloudflare.com, across 2 name servers. NOTED
- The registration is paid up to 2026-10-01. NOTED
- It is hosted on CLOUDFLARENET, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about solumedia.com.ar at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
