Key findings

- Automated classification: Not Scam.
- Public web-archive history exists since 2008.
- No flags from the reputation services TrustSniffer consulted at assessment time.
- The operator behind the site could not be independently connected to a real-world brand or person.

Full analysis

Overview

Sony Music Shop is an established Japanese ecommerce storefront offering Sony Music releases, artist merchandise, limited editions, books, CDs, vinyl records, Blu-ray discs, and DVDs through ordinary retail transactions operated by Sony Music Solutions Inc.

Scam/Impersonation Risk

No contradictions were observed. The storefront presents a coherent Sony Music retail identity, with no detected phishing, impersonation, malicious behavior, or suspicious content indicators. Its account and cart functions are consistent with the stated ecommerce purpose, and the available reputation checks were clean. Historical evidence also supports a long-established domain with no detected repurposing or semantic discontinuity.

- Domain registered in 2008 and approximately 17.7 years old.
- 15 archive snapshots spanning 2008–2010 across 3 tracked years.
- The homepage presents Sony Music products, artist releases, merchandise, and standard shopping functions without detected fraud indicators.

Regulatory Verification Notes

The site identifies Sony Music Solutions Inc. as its operator and provides customer-support, shipping, privacy, cookie, terms, and legal-commerce information. No sector-specific license is claimed or required by the described retail model, although the available evidence does not establish a separate corporate-registration or licensing verification. This is a transparency item for ordinary commercial due diligence, not an indication of impersonation or fraud.

- The homepage identifies the business as an online retailer for physical music, video, books, and merchandise.
- Legal, privacy, cookie, terms, shipping, and customer-support links are present.
- The site's external reputation checks recorded zero malicious and zero suspicious detections.

What to Verify Next

For higher-value commercial engagement, confirm the operator and applicable consumer-commerce obligations through the relevant Japanese corporate or consumer-protection registries, and validate customer-support channels using independently sourced Sony Music information.

- The homepage provides account, cart, shipping, and customer-support pathways.

- The site includes terms, privacy, cookie, and legal-commerce pages suitable for review before purchase.
- The storefront’s visible catalog and retail workflow are consistent with its stated business model.

Summary Verdict

The website presents a legitimate, established, and trustworthy ecommerce posture. Its identity, content, operating model, technical evidence, and external reputation converge without material contradiction, making normal interaction and standard account use appropriate.

Infrastructure Integrity

The site is served through AS16509 operated by Amazon.com, Inc. Its transport encryption uses a valid DV certificate issued by Amazon RSA 2048 M04, with validity through 2026-10-04; this provides sound baseline connection security, while certificate validation alone does not independently establish corporate identity.

- Hosted on AS16509 (AMAZON-02 - Amazon.com, Inc., US).
- TLS certificate issuer: Amazon RSA 2048 M04.
- Certificate validation level: DV; valid to 2026-10-04T23:59:59+00:00.

Closing Assessment

Normal browsing, account login, and standard purchasing activity are appropriate, with routine commercial due diligence proportionate to transaction value.

Written analysis generated 2026-08-01 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of sonymusicshop.jp.

- The request stayed on sonymusicshop.jp. It was not redirected to another domain. CLEAR
- The earliest public archive of this site is from 2008-11-09. CLEAR
- It is hosted on AMAZON-02, from a server in US. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about [sonymusicshop.jp](#) at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
