Full analysis

Overview

Soul TV is a Portuguese-language live television streaming service presenting more than 200 channels across news, sports, films, music, culture, regional programming, and other categories, with advertising and account features supporting an online entertainment business model.

Scam/Impersonation Risk

No contradictions were observed across the site's identity, content, technical behavior, and external reputation signals. The homepage presents a coherent live-TV service with a functioning video player, channel programming, advertising, legal information, and no detected phishing, impersonation, credential-harvesting, or financial-manipulation indicators.

- The homepage identifies Soul TV as a live television platform with more than 200 channels and account actions.
- The homepage's behavioral analysis found no hidden forms, external password forms, wallet activity, clipboard manipulation, or cloaking.
- The domain was registered on 2018-08-14 and is approximately 7.97 years old.
- Archive records contain 125 snapshots spanning 2020-07-09 through 2026-05-11, covering 7 tracked years.

Regulatory Verification Notes

The site states that displayed channels are covered by licensing agreements and provides legal information, but the supplied page evidence does not identify a licensing authority or registration number. This is a limited disclosure point requiring ordinary rights and corporate due diligence, not an indication of deception. The registration record identifies RICARDO FRANCO DE GODOY EPP, while broader third-party broker matching was absent.

- The homepage contains a statement that displayed channels are covered by licensing agreements.
- The homepage includes legal-information links and account-related actions.
- The site is served from AS13335, Cloudflare; its TLS certificate is issued by WE1 with DV validation and is valid through 2026-09-26.

What to Verify Next

For institutional onboarding or rights-sensitive use, confirm the relevant broadcasting and content-licensing arrangements through the applicable registry or rights holder, and validate official support channels through an

independently sourced business contact route.

- The homepage identifies advertising, live playback, channel categories, and licensing information as core service elements.
- Legal information is accessible from the site's primary interface.
- Account registration and login are presented as standard platform functions.

Summary Verdict

Soul TV presents as an established, legitimate, and trustworthy entertainment platform with a coherent operating model and no observed scam or impersonation contradictions. Normal interaction, including account login and standard use, is appropriate.

Infrastructure Integrity

Cloudflare provides the site's CDN and WAF protection, and all observed addresses were CDN edge servers rather than an exposed origin. This reduces direct infrastructure exposure and is a mitigating security factor, although it is not independently proof of legitimacy.

Closing Assessment

Normal streaming, login, and account use are appropriate; organizations requiring formal rights assurance should complete their standard licensing and corporate due diligence.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about soultv.com.br at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
