Assessed 2026-10-02 by automated analysis. Classification confidence 55%.

What this site appears to be

Landing page posing as a technology-focused investment/trading platform centered on Tesla and SpaceX, offering CFD trading, curated portfolios, cryptocurrency markets, and investment plans that advertise specific high returns and require deposits. The page combines prominent brand names, account signup/login and funding calls-to-action, but lacks verifiable credentials and contains strong yield promises.

Evidence status and limitations

Evidence completeness: UNKNOWN

- The real-world operator identity was not independently verified.
- Module-level completeness metadata is unavailable for this legacy report.

Full analysis

Security Alert

Fortinet flagged this site in external intelligence checks, indicating elevated compromise/scam exposure that requires immediate caution.

This website presents itself as a technology-focused online trading and investment platform built around Tesla and SpaceX, offering CFD trading, curated portfolios, cryptocurrency markets, and deposit-funded investment plans that promise returns.

Scam/Impersonation Risk

The site presents a **critical sensitive-interaction risk**. A confirmed blacklist listing is present, and the homepage combines prominent Tesla and SpaceX branding with login, signup, and funding workflows without establishing a verifiable relationship to those companies. Its investment model includes guaranteed or aggressively high-return claims, requires deposits before service, and involves custody or control of customer funds. These features create a direct risk to credentials and financial assets, particularly because the site's

visible claims are not supported by corresponding evidence. No separate conflicting legal-entity names were observed, but the confirmed blacklist signal and the page-level financial solicitation are sufficient to make the risk posture clearly cautionary.

EVIDENCE

- Homepage: presents Tesla- and SpaceX-focused investment opportunities, CFD trading, curated portfolios, cryptocurrency markets, and deposit-based investment plans.
- Homepage: advertises account login, signup, and funding/payment forms, including a sensitive form directed to an untrusted destination.
- External reputation assessment: the domain is confirmed as blacklisted, with Fortinet among the flagged vendors.
- Domain registration record: registered 2026-08-06 and approximately 0.15 years old.

Regulatory Verification Notes

The available site material identifies trading, investment, cryptocurrency, and custody-related services but does not present a license authority or license number. The legal and regulatory disclosure is therefore insufficient for independently confirming authorization to provide the advertised financial services. This is a material verification gap rather than, by itself, a separate finding of fraud. The operator identity also remains unverified; the available evidence does not independently connect the site to Tesla, SpaceX, or a regulated financial institution. The absence of a broker match in the available third-party broker dataset provides no positive regulatory conclusion.

EVIDENCE

- Homepage navigation: includes “Legal & Regulation,” “About Us,” “FAQ,” and “Contact,” but the supplied content contains no license authority or registration number.
- Domain registration record: registrar identified as NameSilo, LLC; registrant recorded as Aiden Read.
- Transport and hosting telemetry: TLS uses issuer YR1 with DV validation and is valid to 2026-11-04; the service is hosted by PLI-AS - Private Layer INC, PA on AS51852.

What to Verify Next

No login, credential submission, deposit, payment, or transfer should occur unless the operator’s legal identity and authorization are independently confirmed. A prospective counterparty should verify any claimed authorization directly with the relevant financial-services regulator, confirm that Tesla and SpaceX have no connection to the platform through independently sourced corporate channels, and validate the payment beneficiary and withdrawal terms before considering any interaction. Existing users should review account, payment, and device activity through trusted channels and contact their financial institution if funds or credentials have already been submitted.

EVIDENCE

- Homepage: requests account creation and funding before access to the advertised investment service.
- Homepage: uses Tesla and SpaceX branding while presenting no supplied evidence of corporate affiliation.
- Site behavior: recorded 48 external XHR requests and 15 external POST requests, with 15 XHR and 6 POST requests identified as non-whitelisted.

Summary Verdict

The overall posture is critical and unsuitable for sensitive interaction. The available evidence converges on an unverified investment platform with material financial-solicitation concerns and a confirmed blacklist contradiction. Apparent operational functionality does not overcome the identity, business-model, and external-reputation concerns.

Infrastructure Integrity

The site resolves directly to a likely origin address rather than through a detected CDN, with one hosting IP, 179.43.183.46, in Panama. The infrastructure provider is PLI-AS - Private Layer INC, PA, AS51852; the DV TLS certificate provides transport encryption but does not establish operator identity or legitimacy.

Closing Assessment

Treat the site as unsuitable for login, credential entry, downloads, deposits, or other financial interaction, and use independently sourced institutional channels for any related verification or remediation.

About this assessment

A trust score summarises the evidence TrustSniffer could collect about spacevisionx.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
