

Is spbtv.com legit? TrustSniffer's high-trust assessment: 100/100

spbtv.com

Verdict

100

OUT OF 100

HIGH TRUST

spbtv.com appears legitimate.

Our checks found nothing pointing to fraud. Ordinary care still applies when you pay or sign in.

Not Scam

Low Risk

Assessed 2026-08-03 by automated analysis. Classification confidence 75%.

What this site appears to be

SPB TV presents B2B OTT/IPTV technology for launching streaming services, monetizing video advertising, transcoding media, storing content, analyzing operations, and integrating Android TV hardware. The primary conversion action is contacting the company for a demonstration or price.

Evidence status and limitations

Evidence completeness: UNKNOWN

- Module-level completeness metadata is unavailable for this legacy report.

Key findings

- Automated classification: Not Scam.
- Domain age: more than 10 years (registration continuity).
- Public web-archive history exists since 2004.
- No flags from the reputation services TrustSniffer consulted at assessment time.

Full analysis

Overview

The website is SPB TV's business-to-business platform for OTT/IPTV and media technology, presenting turnkey streaming-service deployment, video-advertising monetization, media transcoding, content storage, operational analytics, Android TV hardware, and IoT-enabled home-entertainment integration for operators, media companies, and advertisers.

Scam/Impersonation Risk

No identity contradictions, phishing indicators, brand impersonation, or other scam-related conflicts were observed. The site presents a coherent commercial identity and a mature, technically specific service proposition rather than investment solicitations, artificial returns, or deceptive account-capture mechanics. Its long operating history, extensive archival record, strong global traffic footprint, and clean external threat reputation provide convergent evidence that it is an established, legitimate website.

- Domain records identify Name.com, Inc. as registrar and show registration on 11 September 2007, approximately 18.91 years old, with Dmitrii Filippov and SPB TV AG named in the registration record.
- The web archive contains 660 snapshots spanning 2 February 2004–15 May 2026, covering 23 tracked years, with no suspicious repurposing or semantic drift identified.
- External reputation checks recorded 0 malicious and 0 suspicious detections, no malicious safe-browsing finding, no abuse reports, and no matching threat signatures.
- The domain holds global traffic rank 8,315, placing it within a well-established international web footprint.

Regulatory Verification Notes

The supplied homepage represents SPB TV as a media-technology provider rather than a financial intermediary, broker, payment service, or investment platform. It makes no licensing claim, and the available evidence does not establish that its described software and infrastructure services require financial-services authorization. Corporate identity is supported by the registration record, while the site's company-oriented navigation provides a conventional route to further organizational material; no conflicting legal-entity names were observed. The absence of a match in broker-focused reputation data has no regulatory significance for this business model.

- The homepage describes the offering as turnkey OTT/IPTV infrastructure with a service-launch target of two weeks and directs prospective customers toward a demonstration or pricing discussion.
- The domain registration record names the organization as SPB TV AG and identifies the registrant as Dmitrii Filippov.

- The hosting infrastructure is served from AS197695, operated by AS-REGRU — Domain names registrar REG.RU, Ltd, RU.
- The site uses a valid DV TLS certificate issued by YR1, valid until 5 September 2026.

What to Verify Next

Enterprise onboarding should confirm the contracting entity, registered address, authorized signatory, service-delivery jurisdiction, data-processing terms, security commitments, support arrangements, and applicable service-level obligations through normal procurement and legal review. Technical due diligence should also establish how customer media, analytics, advertising data, and administrative access are segregated and protected before production integration.

- The site navigation exposes dedicated About Us, Partners, Awards, Press, Press Kit, Career, and Contact Us areas that can support corporate due diligence.
- The homepage’s principal conversion path is a request for a demonstration or price rather than an immediate payment or sensitive-data form.
- The assessed landing page contained no login form, hidden form, sensitive-input form, or form submitting to an untrusted destination.
- Interactive testing completed two successful runs without cloaking, clipboard manipulation, wallet-provider activity, suspicious inline scripts, or console errors.

Summary Verdict

SPB TV is a legitimate, established, and trustworthy commercial website. Its identity, operating history, professional content, behavioral profile, and external reputation converge consistently, with no material contradiction or deceptive pattern identified. Normal interaction, including account login and standard use where available, is appropriate.

Infrastructure Integrity

The website is directly hosted without a detected CDN or WAF layer and resolves to a single likely origin rather than distributed edge addresses. This straightforward hosting posture provides less origin shielding than a mainstream protective edge service, but the resolved infrastructure is attributable and the observed configuration does not constitute evidence of abuse or illegitimacy.

Closing Assessment

Prospective customers may engage through normal commercial channels and use standard site functions, while applying routine enterprise procurement, contractual, privacy, and security review before production deployment.

Written analysis generated 2026-08-03 by the TrustSniffer Analysis Engine from the evidence in this report.

What the analysis found

No rule findings contributed to this verdict.

Identity verification

Status	UNVERIFIED
Identity score	30/100
Identity verification confidence	50%

- No on-site identity signals detected

Identity verification measures whether the site can be independently connected to a real-world brand or person. It is separate from the classification confidence.

What TrustSniffer observed

First-party facts recorded during the assessment of spbtv.com.

- The request stayed on spbtv.com. It was not redirected to another domain. CLEAR
- Registration is published under Name.com, Inc.. CLEAR
- DNS for this domain is served by spbtv.media, across 2 name servers. NOTED
- The registration is paid up to 2026-09-11. NOTED
- The earliest public archive of this site is from 2004-02-02. CLEAR
- It is hosted on AS-REGRU, from a server in RU. NOTED

About this assessment

A trust score summarises the evidence TrustSniffer could collect about spbtv.com at assessment time. It is a starting point for your own judgement, not a guarantee: a high score means the signals were consistent with a legitimately operated site, a low or critical score means several risk patterns were present.

TrustSniffer assesses a website from the evidence it can collect at a point in time: domain registration and age, hosting and certificate, the content the site served, and third-party reputation feeds. A score is a summary of that evidence, not a guarantee and not a legal finding. There is no human rating and no user review in it. A site can change after it is assessed.
